CALIFORNIA PROPOSITION 65 WARNING

⚠️ WARNING
This product contains or emits chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

Operator’s Guide
15 H.O. / 25 / 30 HORSEPOWER

Original instructions
Revision A. August 2013

https://www.boat-manuals.com/
FEATURES AT A GLANCE

Easy to Own and Operate

- Three-Year Limited Warranty
- No Scheduled Dealer Maintenance for Three Years of Normal Recreational Use
- No Operational Break-In Procedure
- Easy Starts (no choking or priming)
- Digital Engine Management
- Self Flushing Cooling System
- Long Term Storage Design
- Simplified Winterization Procedure
- Digital Diagnostics
- Low Oil Usage

Durable and Reliable

- Full Corrosion Protection
- *Evinrude E-TEC* Lubrication System
- Auto-Calibrated Linkage
- Robust, Heavy-Duty Design
- Posi-Lock Latches
- Extra Capacity Water Pump
- Iridium Spark Plugs
- Vibration Isolated Electronics
- Beltless 15 Amp Charging System
- Stainless Steel Thermostat
- Nickel/Chrome-Faced Piston Rings
- Micro Finished Connecting Rods/Crankshaft

Cleaner and Quieter

- EPA Emissions Compliance
- European Union Emissions Compliance
- California 3-Star Emissions Compliance
- Sealed Fuel System
- Low Friction Design (No powerhead gears, belts, cams, oil scraping rings, or mechanical oil pump)
- Full Length Insulated Lower Pans
- Quiet Signature Sound
- Air Intake/Silencer
- Idle Air Bypass

https://www.boat-manuals.com/
Dear New Evinrude E-TEC Owner,

Thank you for your recent purchase of an Evinrude E-TEC outboard engine and welcome to the BRP - Evinrude family! Your purchase comes with the full commitment and support of the BRP Evinrude outboard engine team. We are confident that your new engine will provide you and your family with hours of fun and time on the water.

**Power and performance...**

We know that you want performance and immediate response. That's why instant throttle response and hole shot are so important. The key to your new Evinrude E-TEC outboard engine is that every revolution is a power stroke. That means twice the power strokes of a 4-stroke. Plus the computer-controlled engine management system delivers the perfect fuel mix directly to the combustion chamber for hair-trigger response. The natural 2-stroke advantage combined with our super-natural fuel injection and combustion system means that you will gain up to 23% more torque than a comparable 4-stroke outboard engine. Simply stated - more torque, instant throttle response, less weight, and more power - Evinrude E-TEC will deliver.

In addition, Evinrude E-TEC outboard engines require no dealer scheduled maintenance for three years or 300 hours. No inspections or adjustments, no changing gearcase lube, no spring tune-ups - for a full three years, then every three years after that. This means you'll experience more time on the water with your new Evinrude E-TEC outboard engine!

**History & heritage...**

Evinrude E-TEC outboard engines are manufactured in Sturtevant, Wisconsin, in a state-of-the-art manufacturing facility that is less than 30 miles away from where Ole Evinrude invented the first outboard engine more than 100 years ago. And, Evinrude is part of the BRP family of products; inclusively, over 200 years of heritage. Powerful brands including legendary names such as Ski-Doo® snowmobiles, Sea-Doo® personal watercraft and boats, and Can-Am® off-road and on-road products. We take pride in leveraging all of our BRP brands in a very effective way to bring you the most innovative and expertly engineered products.

**The Evinrude Club (T.E.C.) for owners like you!**

As an Evinrude owner you are automatically a member of our Evinrude's owners group, T.E.C. (The Evinrude Club). To start receiving your rewards, like parts and clothing discounts, a T.E.C. membership card, and a window decal, register today at www.TheEvinrudeClub.com

As you experience more with Evinrude, we'd love to hear from you online and encourage you to share your story and pictures while joining the conversation. Visit us on Facebook at www.Facebook.com/BRPEvinrude

Thank you again for your purchase and we look forward to seeing you on the water.

Sincerely,

Steve Laham
Vice President
Sales and Marketing

ABOUT THIS GUIDE

This Operator’s Guide is an essential part of your Evinrude E-TEC outboard. It contains pertinent information which, if followed, will provide you with a thorough understanding needed for proper operation, maintenance, care, and—above all—safety. Safety is our first priority and it should be yours too. It is strongly recommended you read this Guide from cover to cover. The more you know and understand about your Evinrude E-TEC outboard, the greater the safety and pleasure you will get from using it. Following this recommendation will assure the completeness of the information essential to your safety, the safety of any passengers, and other water users.

This Operator’s Guide identifies important safety messages.

Although the mere reading of such information does not eliminate the hazard, the understanding and application of the information will promote the correct use of your outboard engine.

⚠️ Safety Alert Symbol

This is the Safety Alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

This Guide should be kept in a waterproof bag with the outboard at all times during operation. If the product ownership is transferred, this Guide should be forwarded to the new owners.

A responsible, educated boater will fully appreciate the pleasures of boating and will be a safe boater. Boating Safety Classes are conducted by the U.S. Coast Guard Auxiliary, the U.S. Power Squadron and some Red Cross Chapters. For information about classes, call toll free 1-800-336-BOAT.

For additional information about boating safety and regulations, call:

- U.S. Coast Guard Boating Safety Hotline
  1-800-368-5647.

Outside North America please contact your Dealer or distributor for details about boating safety.

This Operator’s Guide uses the following signal words identifying important safety messages.

⚠️ DANGER

Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

⚠️ WARNING

Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ CAUTION

Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

⚠️ NOTICE

Indicates an instruction which, if not followed, could severely damage engine components or other property.

IMPORTANT: Identifies information that will help with assembly and operation of the product.
IMPORTANT SAFETY MESSAGES

This Operator’s Guide contains essential information to help prevent personal injury and damage to equipment. Safety messages appear throughout this Guide in the applicable section.

Be careful! Human error is caused by many factors: carelessness, fatigue, overload, preoccupation, unfamiliarity of operator with the product, drugs and alcohol to name a few. Damage to your boat and outboard can be fixed in a short period of time, but injury or death, has a lasting effect.

⚠️ WARNING

For your safety and the safety of others, follow all safety warnings and recommendations. Do not disregard any of the safety precautions and instructions.

Anyone operating your boat should first read and understand this guide before they operate your boat and outboard.

SAFETY MEASURES — General

- To fully appreciate the pleasures, enjoyment and excitement of boating there are some basic rules that should be observed and followed by any boater. Some rules may be new to you and others may be common sense or obvious... irrespective, take them seriously!

- Be sure at least one of your passengers knows how to handle your boat in case of an emergency.

- All passengers should know the location of emergency equipment and how to use it.

- Know the marine traffic laws and obey them.

- All safety equipment and personal floatation devices must be in good condition and suitable for your type of boat. Always comply with the regulations that apply to your boat.

- Remember, gasoline fumes are flammable and explosive. Always adhere to the fueling procedure contained in this Operator’s Guide and those given to you by the fueling station. Always verify fuel level before use and during the ride. Apply the principle of 1/3 fuel to destination, 1/3 back and 1/3 reserve fuel supply. Do not carry spare fuel or flammable liquids in any storage or engine compartments.

- Whenever running the engine, assure there is proper ventilation to avoid the accumulation of carbon monoxide (CO), which is odorless, colorless, and tasteless, and can lead to unconsciousness, brain damage, or death if inhaled in sufficient concentrations. CO accumulation can occur while docked, anchored, or underway, and in many confined areas such as the boat cabin, cockpit, swim platform, and heads. It can be worsened or caused by weather, mooring and operating conditions, and other boats. Avoid exhaust fumes from your engine or other boats, provide proper ventilation, shut off your engine when not needed, and be aware of the risk of backdrafting and conditions that create CO accumulation. In high concentrations, CO can be fatal within minutes. Lower concentrations are just as lethal over long periods of time.

- Avoid standing up or shifting weight suddenly in light weight boats.

- Keep your passengers seated in seats. The boat’s bow, gunwale, transom and seat backs are not intended for use as seats.

- Insist on the use of personal floatation devices, approved by the U.S. Coast Guard, by all passengers when boating conditions are hazardous, and by children and nonswimmers at all times.

- Proceed with caution and at very low speed in shallow water. Grounding or abrupt stops may result in personal injury or property damage. Also be alert for debris and objects in the water.

https://www.boat-manuals.com/
SAFETY MEASURES — Installation and Maintenance

– Be familiar with the waters you are operating in. The gearcase of this outboard extends below the water surface and could potentially come in contact with underwater obstructions. Contact with underwater obstructions may result in loss of control and personal injury.

– Respect no wake zones, rights of other water users and the environment. As the "skipper" and owner of a boat you are responsible for damage to other boats caused by the wake of your boat. Allow no one to throw refuse overboard.

– Do not operate your boat if you are under the influence of drugs or alcohol.

– High performance boats have a high power-to-weight ratio. If you are not experienced in the operation of a high performance boat, do not attempt to operate one at, or near, its top speed until you have gained that experience.

– Become completely familiar with the control and operation of your boat and outboard before embarking on your first trip or taking on a passenger(s). If you have not had the opportunity to do so with your Dealer, practice driving in a suitable area and feel the response of each control. Be familiar with all controls before applying the throttle above idle speed. As the operator, you are in control and responsible for safe operation.

– The outboard must be correctly installed. Failure to correctly install the outboard could result in serious injury, death or property damage. We strongly recommend that your Dealer install your outboard to ensure proper installation.

– Do not overpower your boat by using an engine that exceeds the horsepower indicated on the boat’s capacity plate. Overpowering could result in loss of control. If your boat has no capacity plate, contact your Dealer or the boat’s manufacturer.

– When replacement parts are required, use Evinrude/Johnson Genuine Parts or parts with equivalent characteristics, including type, strength and material. Using substandard parts could result in injury or product malfunction.

– Only perform service procedures which are detailed in this Operator’s Guide. Attempting to perform maintenance or repair on your outboard if you are not familiar with the correct service and safety procedure could cause personal injury or death. Further information can be obtained from your authorized Evinrude/Johnson Dealer. In many instances proper tools and training are required for certain service or repair procedures.

– Maintain your boat and engine in top condition at all times. Adhere to the Maintenance Schedule on page 53.

– Operate your boat and outboard prudently and have fun. Do not forget that all persons must assist other boaters in case of emergency.

– Prevent injury from contact with rotating propeller; remove propeller before flushing or before performing any maintenance.
PRODUCT REFERENCES, ILLUSTRATIONS AND SPECIFICATIONS

BRP reserves the right to make changes at any time, without notice, to features, specifications and model availability, and to change any specification or part at any time without incurring any obligation to update older models. The information in the Guide is based on the latest specifications available at the time of publication.

Photographs and illustrations used in this Guide might not depict actual models or equipment but are intended as representative views for reference only.

Certain features of systems discussed in this Guide might not be found on all models in all marketing areas.

Owner’s Identification
United States and Canada — At the time of purchase, your Dealer will complete your outboard registration forms. Your portion provides proof of ownership and date of purchase.
Outside United States and Canada — See your Dealer or distributor for details.

Model and Serial Numbers
The model and serial numbers appear on a plate attached to the stern bracket or swivel bracket. Record your outboard’s:

Model Number _______________________
Serial Number _______________________
Purchase Date _______________________
Ignition Key Number ____________________

Stolen Outboards
United States and Canada — Report stolen outboards to your local dealer or distributor.
Outside United States and Canada — Report the theft to the Bombardier Recreational Products distributor where the outboard was registered.

Technical Literature
BRP offers technical literature specifically for your outboard. A service manual, or an extra Operator’s Guide can be purchased from your selling Dealer. For the name and location of the nearest Evinrude Dealer in the United States and Canada visit www.evinrude.com.
DECLARATION OF CONFORMITY

• Application of Council Directives and their relevant harmonized standard(s):

Recreational Craft Directive 94/25/EC as amended by 2003/44/EC
  • EN ISO 8178-1:1996
  • EN ISO 14509

  • EN 55012:2007
  • EN 61000-6-1:2007
  • EN 61000-4-2:2008
  • EN 61000-4-3:2006

Machinery Directive 2006/42/EC
  • ISO 12100:2010

• Product Type:

Marine Outboard 2-Stroke Cycle SI Engine sold under the Evinrude name

Manufacturer: Authorized Representative:
BRP US Inc BRP Europe N.V.
10101 Science Drive Geert De Brandt, Operations Manager
Sturtevant, WI, USA 53177 Skadenstraat 125

I, the undersigned, hereby declare that the product conforms to the above Directive(s) and Standard(s).

George Broughton
Director of Engineering

https://www.boat-manuals.com/
Using Your
Evinrude E-TEC
Outboard
This outboard comes with hang tags and labels containing important safety information about the operation of the outboard. Any person who operates this outboard should read and understand this safety information.

SAFETY ALERT SYMBOLS
The following symbols are used together to indicate “Read the engine’s Operator’s Guide before continuing.”

HANG TAG
All outboards are shipped with the following hang tag attached.

REMOTE CONTROL DECALS
All remote controls have the following labels attached.

WARNING
Locate, read and understand operator’s guide and all warnings. Failure to do so could result in serious injury.

Attach engine shut-off cord (Lanyard) to operator.

Shift position
Reverse / Neutral / Forward
SAFETY INFORMATION ON THE OUTBOARD

WARNING
- Attach engine cut-out switch tether cord to operator.
- Shift control must be in Neutral (N) to start motor.

EMERGENCY RESTART CLIP

Shift position
Reverse / Neutral / Forward

Idle speed control

OIL REQUIREMENTS

**Evinrude/Johnson Brand Oils**

Evinrude/Johnson outboard oils are formulated to give best engine performance while controlling piston and combustion chamber deposits, providing superior lubrication, and ensuring maximum spark plug life.

The following outboard oils are recommended for use in your Evinrude E-TEC outboard:

- Evinrude/Johnson XD100;
- Evinrude/Johnson XD50; or
- Evinrude/Johnson XD30.

**Evinrude/Johnson XD100 Oil**

Evinrude/Johnson XD100 oil is preferred for your Evinrude E-TEC outboard. This synthetic formula oil provides uncompromised lubrication and superior performance, even in extreme conditions—especially in cold temperatures down to 0°F (-17°C).

If requested, an authorized dealer can program your Evinrude E-TEC outboard EMM for the exclusive use of Evinrude/Johnson XD100. Only an authorized Evinrude dealer can program your outboard for this optional benefit. Oil consumption is reduced if the outboard is programmed for exclusive use of Evinrude/Johnson XD100 as compared to using a conventional oil. The XD100 oil setting is not available on all models.

**IMPORTANT:** If your EMM has been programmed for Evinrude/Johnson XD100, DO NOT use any other oil unless in an emergency. If Evinrude/Johnson XD100 is temporarily unavailable, a one-time-only use of an oil that meets NMMA TC-W3 certification standards is allowed. If you discontinue using Evinrude/Johnson XD100, you MUST first return to your Dealer to have the EMM reprogrammed back to the original factory setting.

**Other Oils**

If Evinrude/Johnson brand oils are not available, you must use an oil that meets NMMA TC-W3 certification standards.

Failure to follow oil specifications could void the engine warranty if a lubrication-related failure occurs.

OILING SYSTEM INFORMATION

**IMPORTANT:** The oiling system must be primed on new outboards. Refer to Priming the Oil System on page 20.

If a “LOW OIL” warning occurs, you have a limited amount of time of normal operation before running out of oil. Refill the oil tank with approved oil as soon as possible.

Refer to Engine Monitoring on page 43.

Check the oil tank level frequently. Always “top off” your oil tank prior to prolonged usage or long trips.

New outboards are programmed to use additional oil during the first two hours of operation above 2000 RPM.

**NOTICE** When operating in conditions under 32°F (0°C), Evinrude/Johnson XD100 oil must be used.

Always keep an extra supply of outboard oil in the boat. Refer to Oil Requirements on page 19.

If you run the oil tank empty, you MUST refill the oil tank and prime the oil system before using the engine. Refer to Filling the Oil Tank on page 20 and Priming the Oil System on page 20.
**Filling the Oil Tank**

Release rear engine cover latch by pulling the handle back and turning downward.

Pull up on the tilt handle to release the engine cover seal on the engine cover.

Release the hook from its catch in the front and remove the engine cover to access the oil tank.

Remove the filler cap and fill the tank with the recommended outboard lubricant, as specified in **Oil Requirements** on page 19.

Replace the filler cap and tighten securely. Reinstall the engine cover.

**IMPORTANT:** The oil tank capacity is 1.5 quarts (1.4 liters).

**PRIMING THE OIL SYSTEM**

**NOTICE** The oiling system MUST be primed to avoid engine damage from a lack of lubrication.

Prime the oiling system to remove air from the system before operating the outboard if:

- The outboard is new – Dealer must prime the oiling system using *Evinrude Diagnostic* software;
- The oil tank is emptied or outboard is run out of oil;
- The outboard is laid down for transportation or storage.

Prime the oiling system by performing winterization. Refer to **Long-Term Storage (Winterization)** on page 58.
FUELING PROCEDURE

WARNING
Fuel is flammable and explosive under certain conditions. Follow these instructions to ensure safety when handling fuel:

• Always work in a well ventilated area.
• Always turn off the engine before fueling.
• Never permit anyone other than an adult to refill the fuel tank.
• Do not smoke, or allow open flames, or sparks or use electrical devices such as cellular phones in the vicinity of a fuel leak or while fueling.
• When fueling, keep boat level.
• Remove portable fuel tanks from the boat before fueling.
• Fuel tank may be pressurized, turn cap slowly when opening.
• Do not overfill or top off the fuel tank and leave boat in the sun. As temperature increases, fuel expands and might overflow.
• Always wipe off any fuel spillage.

Portable Fuel Tank Cap
Allow fuel vapor to escape before removing the fuel tank cap.
1) Open the vent screw on fuel tank cap.
2) Turn the cap counterclockwise until the cap contacts the pressure relief tab.
3) Press down on the tab and turn the cap one-quarter turn counterclockwise until the cap contacts the pressure relief tab again.
4) Allow fuel vapor to escape.
5) Press down on tab to remove cap.

Always follow the instructions provided with the fuel tank and cap.

On a Trailer
1) Make sure the boat is level.
2) Slowly turn the fuel tank cap counterclockwise to remove it.
3) Insert the gas pump nozzle into the filler neck of the fuel tank.
4) Fill the fuel tank.

WARNING
To prevent fuel back-flow, fill the fuel tank slowly so air can escape from tank.
5) Stop filling immediately when the automatic shut-off feature of the gas pump handle activates.
6) Wait a moment before removing the gas pump nozzle from the filler neck. Do not retract the gas pump nozzle from the filler neck to top off the fuel tank.
7) Install the fuel tank cap and turn clockwise to fully tighten it.

In the Water
1) Turn off engine.
2) Tie boat securely to the fueling pier.
3) Do not allow anyone to remain in or on the boat.
4) Have a fire extinguisher close at hand.
5) Slowly turn the fuel tank cap counterclockwise to remove it.
6) Insert the gas pump nozzle into the filler neck of the fuel tank.
7) Fill the fuel tank.

WARNING
To prevent fuel back-flow, fill the fuel tank slowly so air can escape from tank.
8) Stop filling immediately when the automatic shut-off feature of the gas pump handle activates.
9) Wait a moment before removing the gas pump nozzle from the filler neck. Do not retract the gas pump nozzle from the filler neck to top off the fuel tank.

Install fuel tank cap and turn clockwise to fully tighten it.
FUEL REQUIREMENTS

⚠️ WARNING
Gasoline is extremely flammable and highly explosive under certain conditions. Follow the instructions in this section explicitly. Improper handling of fuel could result in property damage, serious injury or death.
Leaking fuel is a fire and explosion hazard. All parts in the fuel system should be inspected frequently and replaced if signs of deterioration or leakage are found. Inspect the fuel system each time you refuel, each time you remove the engine cover and annually.

NOTICE Always use fresh gasoline. Gasoline will oxidize; the result is loss of octane, volatile compounds, and the production of gum and varnish deposits which can damage the fuel system.

Fuel blending varies by country and region. Your outboard has been designed to operate using the recommended fuels; however, be aware of the following:
- The boat’s fuel system may have different requirements regarding the use of alcohol fuels. Refer to the boat’s owner guide.
- Alcohol blended fuels attract and hold moisture which may lead to fuel phase separation and can result in engine performance problems or engine damage.
- Use of fuel containing alcohol above the percentage specified by government regulation can result in the following problems in outboard engines and fuel system components:
  - Vapor lock or fuel starvation
  - Starting and operating difficulties
  - Deterioration of rubber or plastic parts
  - Corrosion of metal parts
  - Damage to internal engine parts
- Inspect frequently for the presence of fuel leaks or other fuel system abnormalities if you suspect the presence of alcohol in gasoline exceeds the current government regulations.

Recommended Fuel: Use unleaded gasoline with an AKI (R+M)/2 octane rating of 87, or an RON octane rating of 90.

Use in North America

⚠️ NOTICE Do NOT use fuel from fuel pumps labeled E85. Never experiment with other fuels.

The use of unleaded gasoline containing alcohol above the percentage specified by government regulations is not recommended. Use of fuel labeled E15 is prohibited by U.S. EPA Regulations.

Use of a boat mounted water-separating fuel filter is strongly recommended.

Use Outside North America

The use of unleaded gasoline containing alcohol above the percentage specified by local government regulations is not recommended.

Use of a boat mounted water-separating fuel filter is strongly recommended.
FUEL ADDITIVES
The only fuel additives approved for use in your Evinrude E-TEC outboard are:
• Evinrude/Johnson 2+4 Fuel Conditioner
• Evinrude/Johnson Fuel System Cleaner

**NOTICE** Use of other fuel additives can result in poor performance or engine damage.

Evinrude/Johnson 2+4 Fuel Conditioner will help prevent gum and varnish deposits from forming in fuel system components and will remove moisture from the fuel system. It can be used continuously and should be used during any period when the outboard is not being operated on a regular basis. Its use will help reduce spark plug fouling and deterioration of fuel system components.

Evinrude/Johnson Fuel System Cleaner will help keep fuel injectors in optimal operating condition.

FUEL SYSTEM INFORMATION

**WARNING**
Store portable fuel tanks in well-ventilated areas, away from heat sources and open flames.
Close the vent screw of the fuel tank cap, if equipped, to prevent escape of fuel or fuel vapors which could accidentally ignite.
Do not allow disconnected fuel hoses to leak fuel.
Always wipe off any fuel spillage.

In the United States, the U.S. EPA requires “low permeability” fuel hose, fuel primer bulbs, portable fuel tanks and fuel caps to be used with outboard engines.

**IMPORTANT**: Fuel distribution hoses in the boat must deliver fuel at a specific flow rate. Minimum inside diameter of fuel hoses must be 5/16 in. (8 mm).

Fuel systems with built-in tanks, particularly those that include antisiphon valves and filter/ primer units, may have restrictions not allowing the engine fuel pump to deliver sufficient fuel under all conditions. This can result in a loss of performance. If a performance problem exists, see your Dealer.

Fuel Filters
A boat-mounted water-separating fuel filter assembly will help prevent water and other contaminants from entering the engine fuel system.

Use of a boat mounted water-separating fuel filter is highly recommended on all boats.

Boat-mounted water-separating fuel filter assemblies must meet the required fuel flow and filter specification. Refer to Boat-Mounted Fuel Filters on page 66.

Fuel Hose Connections
1) If the fuel hose is disconnected for any reason, seal it to prevent spillage. Cap the fuel fitting to prevent contamination.
2) Connect the fuel hose to the 3/8 in. (9 mm) fuel fitting. Fasten hose securely with clamp (18.5 mm) from owner’s kit.
3) Squeeze fuel primer bulb, outlet end up, until firm.

Fuel System Priming
If the outboard is run out of fuel, refill the fuel tank and squeeze the primer bulb until firm.

Rope Start Models
Prime the electric fuel pump by first removing the engine cut–off switch clip and then pulling the rope at least two times. This will cause the fuel pump to fill the injectors. Replace the engine cut–off switch clip and follow the normal starting procedure.
SAFETY INFORMATION

⚠️ DANGER
Serious injury or death can result from contact with a rotating propeller or moving boat and outboard.
Blades can be sharp and the propeller can continue to turn even after the engine is off.
Assure the engine and prop area is clear of people and objects before starting engine or operating the boat.
Be alert of people in the water.
Always shift the outboard to NEUTRAL and shut off the engine immediately when your boat is in an area where there might be people in the water.

⚠️ DANGER
DO NOT run the engine indoors or without adequate ventilation or permit exhaust fumes to accumulate in confined areas. Engine exhaust contains carbon monoxide which, if inhaled, can cause serious brain damage or death.

⚠️ WARNING
The engine cover is a machinery guard. DO NOT operate your outboard with the cover off unless you are performing maintenance or emergency starting, and then be careful to keep hands, hair, and clothing clear of all moving parts. Contact with moving parts could cause injury.

⚠️ WARNING
Be familiar with the waters you are operating in. The gearcase of this outboard extends below the water surface and could potentially come in contact with underwater obstructions. Contact with underwater obstructions may result in loss of control and personal injury.

ENGINE STARTING / STOPPING - TILLER MODELS
Refer to the Pre-Ride Inspection on page 49. Complete the inspection before using your Evinrude E-TEC outboard.

⚠️ NOTICE
You MUST supply water to the engine before attempting to start it. Engine damage can occur quickly.
Be sure the water intake screens are below the water surface.

Connecting the Fuel Hose
Connect the fuel hose to the fuel connector.

1. Fuel connector 007004

If equipped, open vent screw on fuel tank cap.
Squeeze fuel primer bulb, outlet end up, until firm.

Engine Cut–off Switch
The engine cut–off switch is on the steering handle. Use of the engine cut–off switch feature is highly recommended on all boats.
Connect the clip to the engine cut-off switch.

Disconnecting the clip and tether cord will stop the engine and prevent the boat from becoming a runaway if the driver moves beyond the range of the tether cord. If the tether cord is too long, it can be shortened by knotting or looping it. DO NOT cut and retie the tether cord.

An extra clip is stored on the tiller handle. If the operator is thrown from the boat, another person can insert the extra clip in the engine cut-off switch and start the outboard.

Snap the tether cord to a secure place on the operator’s clothing or life vest — not where it might tear away instead of activating the engine cut-off switch.

Avoid knocking or pulling the clip off the engine cut-off switch during normal boating. The resulting unexpected loss of forward motion can throw occupants forward, causing injury.

Keep the tether cord free from obstructions and entanglements.

At each outing, test the system’s operation. With the engine running, remove the clip from the switch by pulling the tether cord. If the engine does not stop running, see your Dealer.

Carefully check the function of all control and engine systems before leaving the dock. DO NOT shift the engine into FORWARD or REVERSE while it is shut off.
Move the shift lever to NEUTRAL. Refer to Shifting and Speed Control - Tiller Models on page 28.

Twist throttle grip to SLOWEST speed position.

**WARNING** Always shift to NEUTRAL before starting the outboard to prevent sudden boat movement, which can cause injury.

DO NOT advance the throttle before start-up. Advancing the throttle overrides the electronic idle control system.

If the outboard is started with the throttle advanced, the outboard will be in a safety mode. It will not respond to throttle until the throttle twist grip is returned to slowest speed position.

After the engine starts, the engine management module (EMM) automatically increases idle speed slightly. Idle speed will decrease as the engine warms up.

**Starting – Tiller Rope Models**

While seated, grasp the starter handle and pull slowly until the starter engages, then pull hard. Repeat, if needed, until outboard starts.

**NOTICE** To prevent damage to starter assembly, allow starter cord to rewind before releasing starter handle.

**IMPORTANT:** Engine will not start if outboard is in gear or if tether cord is not in place.

If your outboard does not react normally to this starting procedure or if it fails to start, refer to Troubleshooting on page 62.

**Starting – Tiller Electric Models**

While seated, press the start button. (If equipped with a key switch, it must be in the

https://www.boat-manuals.com/
ON position.) Crank the engine no longer than 20 seconds.

Upon start-up, release the button. If the engine did not start, release the button momentarily, then try again.

**NOTICE** The starter motor can be damaged if operated continuously for more than 20 seconds.

**IMPORTANT:** Engine will not start if outboard is in gear or if tether cord is not in place. If your outboard does not react normally to this starting procedure or if it fails to start, refer to **Troubleshooting** on page 62.

**After Engine Starts**
Check the water pump indicator. A steady stream of water indicates the water pump is working. If a steady stream of water from the water pump indicator is not visible, stop the engine. Refer to **Engine Overheating** on page 43.

**Engine Stopping**
Twist the throttle grip to SLOWEST speed position.
Move shift lever to NEUTRAL.

Press the engine cut–off switch until the outboard stops running. If equipped, close the vent screw on the fuel tank’s filler cap.

**Disconnecting the Fuel Hose**
Disconnect the fuel hose from the fuel connector.

**WARNING**
A small amount of fuel may be released when the fuel connector is disconnected. Always wipe off any fuel spillage.

If equipped, close vent screw on fuel tank cap.
**Using Your Evinrude E-TEC Outboard**

**SHIFTING AND SPEED CONTROL - TILLER MODELS**

**NOTICE** Carefully check the function of all control and engine systems before leaving the dock. DO NOT shift the outboard into FORWARD or REVERSE while it is shut OFF.

**Shifting**

With engine running, twist the throttle grip to SLOWEST speed position.

Move the shift lever with a firm, quick motion, to FORWARD or REVERSE gear.

1. Shift lever
2. FORWARD
3. REVERSE

**WARNING**

Do not operate the outboard in REVERSE with the tilt/run lever in TILT. The outboard may tilt out of the water, resulting in loss of control.

**NOTICE** When shifting from FORWARD to REVERSE or from REVERSE to FORWARD, pause at NEUTRAL until the engine is at idle speed and the boat has slowed.

**Speed Control**

With the outboard running, twist throttle grip:
- Clockwise to decrease speed; or
- Counterclockwise to increase speed

1. Decrease speed
2. Increase speed

**Throttle Friction**

Adjust the throttle friction knob to reduce the effort required to hold a throttle setting.

1. Throttle friction screw

**WARNING**

Tighten knob only enough to hold throttle at a constant engine speed. Overtightening will prevent quick throttle change in case of emergency.
IDLE SPEED CONTROL SWITCH
This switch allows idle speed to be adjusted between 625 RPM and 900 RPM (approximate).

Press and release the – side of the switch to decrease speed. Press and release the + side of the switch to increase speed. Engine speed changes in 50 RPM increments.

This switch can be used to fine tune speeds between 600 to 2300 rpm. Advance the throttle twist grip to desired rpm. Use switch to increase or decrease engine speed.

Shifting out of gear or changing throttle twist grip position will deactivate speed control. Stopping the engine restores the factory idle speed setting.

TRIM/TILT SWITCH
If equipped, the trim/tilt switch is located in the end of tiller handle. Press switch as indicated for UP and DOWN operation.

TILLER HANDLE ADJUSTMENTS

Tiller Handle Angle
Tiller handle angle can be raised or lowered by turning the adjustment screw under the handle.

Tiller Handle Ratchet
Tiller models feature a ratchet which holds the tiller arm at approximately 30° or 90° positions. Press up on the release lever to lower tiller arm.
ENGINE STARTING / STOPPING - REMOTE CONTROL MODELS

Refer to the Pre-Ride Inspection on page 49. Complete the inspection before using your Evinrude E-TEC outboard.

**NOTICE** You MUST supply water to the engine before attempting to start it. Engine damage can occur quickly.

Be sure the water intake screens are below the water surface.

**Connecting the Fuel Hose**

Connect the fuel hose to the fuel connector.

If equipped, open vent screw on fuel tank cap.

Squeeze fuel primer bulb, outlet end up, until firm.

**Engine Cut–off/Key Switch**

A combination engine cut–off switch and key switch is a feature of Evinrude prewired remote controls and all Evinrude control wiring kits. Use of the engine cut–off feature is highly recommended on all boats.

In an emergency situation, the engine can be started without the clip in place. Follow the normal starting procedure. Reinstall a clip as soon as possible. **The operator should always use the clip and tether cord anytime the engine is running.** Refer to Engine Cut–off/Key Switch on page 30.

**WARNING**

Always use the tether cord when operating your boat to help prevent a runaway boat and reduce the risk of personal injury or death.

In an emergency situation, the engine can be started without the clip in place. Follow the normal starting procedure. Reinstall a clip as soon as possible. **The operator should always use the clip and tether cord anytime the engine is running.** Refer to Engine Cut–off/Key Switch on page 30.

**IMPORTANT**: Your engine cut–off switch can be effective only when in good working condition. At each outing, inspect clip and tether cord for cuts, breaks, or wear. Replace worn or damaged parts.

Snap the tether cord to a **secure** place on the operator’s clothing or life vest — not where it
might tear away instead of activating the engine cut-off switch.

Disconnecting the clip and tether cord will stop the engine and prevent the boat from becoming a runaway if the driver moves beyond the range of the tether cord. If the tether cord is too long, it can be shortened by knotting or looping it. DO NOT cut and retie the tether cord.

**WARNING**
Avoid knocking or pulling the clip off the engine cut-off switch during normal boating. Avoid bumping the key if operating without the clip on the switch. The resulting unexpected loss of forward motion can throw occupants forward, causing injury.
Keep the tether cord free from obstructions and entanglements.
At each outing, test the system’s operation. With the engine running, remove the clip from the switch by pulling the tether cord. If the engine does not stop running, see your Dealer.

**NOTICE** Carefully check the function of all control and engine systems before leaving the dock. DO NOT shift the engine into FORWARD or REVERSE while it is shut off.

If the following directions are not suitable for your boat’s control, see your Dealer before proceeding.

Move the remote control handle to NEUTRAL.

**WARNING**
If you are using a remote control that does not have start-in-gear prevention, the outboard can be started while it is in gear. Always shift to NEUTRAL before starting the outboard to prevent sudden boat movement, which can cause injury.

Set control to SLOWEST speed position.

**NOTICE** Carefully check the function of all control and engine systems before leaving the dock. DO NOT shift the engine into FORWARD or REVERSE while it is shut off.

If you are using a remote control that does not have start-in-gear prevention, the outboard can be started while it is in gear. Always shift to NEUTRAL before starting the outboard to prevent sudden boat movement, which can cause injury.

Set control to SLOWEST speed position.

**NOTICE** Carefully check the function of all control and engine systems before leaving the dock. DO NOT shift the engine into FORWARD or REVERSE while it is shut off.
Using Your Evinrude E-TEC Outboard

**Engine Starting**

Turn the key switch fully clockwise to the START position.

**NOTICE** The starter motor can be damaged if operated continuously for more than 20 seconds.

Upon start-up, release the key.

If the engine did not start, release the key momentarily, then try again.

Each time the key switch is turned from OFF to ON, the warning system will self-test. Refer to **Engine Monitoring** on page 43. If the warning system fails to self-test during start-up, see your Dealer.

If your outboard does not react normally to this starting procedure or if it fails to start, refer to **Troubleshooting** on page 62.

**After Engine Starts**

Check the water pump indicator. A steady stream of water indicates the water pump is working. If a steady stream of water from the water pump indicator is not visible, stop the engine. Refer to **Engine Overheating** on page 43.

**Engine Stopping**

Move control handle to NEUTRAL.

Turn key switch counterclockwise to the OFF position.

Remove the key when the boat will be unattended.
**Disconnecting the Fuel Hose**

Disconnect the fuel hose from the fuel connector.

**WARNING**

A small amount of fuel may be released when the fuel connector is disconnected. Always wipe off any fuel spillage.

1. Fuel connector

If equipped, close vent screw on fuel tank cap.
If you choose a non-Evinrude remote control, it must have a start-in-gear prevention feature. This feature can prevent injuries resulting from unexpected boat movement when the engine starts.

**IMPORTANT:** When selecting the remote control system for your boat, specify Evinrude components. Evinrude controls deliver the cable stroke your outboard needs for positive shift and throttle control, and they incorporate such safety and convenience features as:

- Start-in-gear prevention
- Plug-in compatibility with Evinrude Modular Wiring System (MWS)

---

### Side Mount Control
1. Handle – shift and throttle
2. Trim/tilt switch (where equipped)
3. Neutral lock lever
4. Fast idle lever (warm-up)
5. Throttle friction adjusting screw
6. Engine cut–off switch clip and tether cord

### Single Lever Binnacle Mount Control
1. Handle – shift and throttle
2. Trim/tilt switch (where equipped)
3. Fast idle button (warm-up)
4. Throttle friction adjusting screw (under cover)
5. Engine cut–off switch clip and tether cord

### Concealed Side Mount Control
1. Handle – shift and throttle
2. Trim/tilt switch (where equipped)
3. Neutral lock lever
4. Fast idle button (warm-up)
5. Throttle friction adjusting screw

### Dual Lever Binnacle Mount Control
1. Handle – shift and throttle
2. Trim/tilt switch (where equipped)
3. Fast idle button (warm-up)
4. Throttle friction adjusting screw (under cover)
Shifting

NOTICE When shifting from FORWARD to REVERSE or from REVERSE to FORWARD, pause at NEUTRAL until the engine is at idle speed and the boat has slowed.

If the following directions are not suitable for your boat’s control, see your Dealer before proceeding.

With engine running and control handle in NEUTRAL:

Side Mount Controls
Unlock the control handle by lifting the neutral lock lever on the hand grip. Move the control handle with a firm, quick motion, forward or aft until it engages the forward or reverse gear detent.

Binnacle Mount Controls
Move the control handle with a firm, quick motion, forward or aft until it engages the forward or reverse gear detent.

Speed Control
After gear engagement, move the control handle slowly in the same direction to increase speed.

FUEL ECONOMY
Fuel economy can vary depending on boat load, hull design, and throttle setting. When boat reaches top speed, throttle back from FULL SPEED to a lower throttle setting. You will save fuel with a minimal loss of speed.
TILTING AND TRIM

MANUAL TILT MODELS

IMPORTANT: Use the tilt grip to tilt your outboard. Do not use the tiller handle as a lever.

Tilt UP
Move the tilt/run lever to TILT position.

Grasp the tilt grip on engine cover and tilt outboard to the full tilt position.

The tilt support bracket will automatically engage.

Tilt DOWN
Move tilt/run lever to RUN position.

Grasp the tilt grip on engine cover and raise outboard slightly. The tilt support will automatically disengage. Slowly lower outboard to its normal operating (RUN) position.

WARNING
Leave tilt/run lever in the TILT position while outboard is tilted. If the tilt/run lever is moved to the RUN position, the tilt support bracket can release and the outboard could drop down unexpectedly.

NOTICE
Operate outboard in normal operating position with tilt/run lever in the RUN position.
Trim Angle Adjustment

⚠️ WARNING

Boat stability and steering torque can vary due to changing water conditions. If any adverse conditions occur, reduce throttle and/or adjust tilt angle to maintain control. If you experience boat instability and/or high steering torque, see your Dealer to correct these conditions.

If the bow of the boat plows the water at high speeds, the boat may bow steer or spin suddenly, possibly ejecting or otherwise seriously injuring occupants.

Trim angle adjustment is accomplished by changing the location of the tilt pin.

Run the boat in the water to determine the best trim angle.

**IMPORTANT:** Weight distribution can affect the performance of the boat. Distribute weight evenly in the boat before adjusting trim angle.

The boat should accelerate quickly, plane easily, and run parallel to the surface of the water at high speeds.

If tilt pin is positioned too LOW the front of boat will be DOWN and push water.

If tilt pin is positioned too HIGH the front of boat will be UP and bounce.

To adjust the trim angle, refer to **Tilt Pin** on page 38.

1. Parallel to the surface of the water
2. Tilt pin – LOW position
3. Tilt pin – HIGH position
**Tilt Pin**

To adjust the trim angle:

Place the outboard in full TILT position. Refer to Tilt UP on page 36.
- Grasp the tilt pin retainer and squeeze to release. Slide tilt pin all the way out.
- Insert tilt pin in desire position. Make sure the trim angle adjustment rod passes through both stern brackets.
- Push in against retainer to lock in place. Make sure the tilt pin is locked on the stern bracket.

**Shallow Water Drive**

Tilt the outboard to any position within the tilt range for shallow water operation.

**NOTICE** When operating a tilted outboard, do not run above idle speed. Keep the water intakes submerged at all times to prevent the engine from overheating.

**Engaging Shallow Water Drive**

Slow the engine and shift to NEUTRAL before engaging or disengaging shallow-water drive. Move tilt/run lever to TILT position.

Grasp tilt grip on engine cover and tilt outboard until shallow water drive link engages tilt pin.

Relocate the tilt pin if necessary. Refer to Tilt Pin on page 38.

**WARNING**

When in shallow water drive, your motor has no protection from the effects of underwater impact.
Operate the motor in FORWARD and ONLY at slow speed. The motor can tilt up forcibly and drop suddenly if it hits an underwater object or if you shift to REVERSE and apply throttle. You could lose control.

**Disengaging Shallow Water Drive**

Move tilt/run lever to RUN position.
Grasp tilt grip on engine cover and raise outboard slightly.
The shallow water drive link will automatically disengage.
Slowly lower outboard to its normal operating position.
POWER TRIM AND TILT MODELS

⚠️ WARNING

Any malfunction of the power trim and tilt unit could result in loss of shock absorber protection if an underwater obstruction is hit. Malfunction can also result in loss of reverse thrust capability.

Correct fluid level must be maintained to ensure operation of the impact protection on this unit.

When operating in rough water or crossing a wake, excessive bow-up trim may result in the boat’s bow suddenly rising skyward, possibly ejecting or otherwise seriously injuring occupants.

Some boat/outboard/propeller combinations may encounter boat instability and/or high steering torque when operated at high speed at or near the outboard’s trim range limits (full bow-up or bow-down). Boat stability and steering torque can also vary due to changing water conditions. If any adverse conditions occur, reduce throttle and/or adjust trim angle to maintain control. If you experience boat instability and/or high steering torque, see your Dealer to correct these conditions.

Some boats plow, or are difficult to plane, when operated in the trim’s lowest position. If your boat handles unsuitably when trimmed fully bow-down, adjust transom angle or limit the travel of the power trim.

⚠️ WARNING

If the bow of the boat plows the water at high speeds, the boat may bow steer or spin suddenly, possibly ejecting or otherwise seriously injuring occupants.

1. Parallel to the surface of the water
2. Trim switch, DOWN
3. Trim switch, UP

https://www.boat-manuals.com/
Trim Angle Adjustment

Use the trim/tilt switch to adjust the outboard position in the tilt range or trim range.

Run the boat in the water to determine the best trim angle.

**IMPORTANT:** Weight distribution can affect the performance of the boat. Distribute weight evenly in the boat.

The boat should accelerate quickly, plane easily, and run parallel to the surface of the water at high speeds.

If trim position is too LOW the front of boat will be DOWN and push water.

If trim position is too HIGH the front of boat will be UP and bounce.

**Tilt**

The tilt range allows the operator to tilt the outboard for clearance when beaching, mooring, launching, or trailering.

**Trim**

In most operating conditions, it is recommended to **trim** the outboard to the full down position when accelerating. Once on plane, trim the outboard up for best performance.

Over-trimming increases engine RPM while decreasing speed. The best trim setting is when the highest speed is achieved with the lowest engine RPM.

**Shallow Water Drive**

Adjust the outboard position within the tilt range for shallow water operation.

**NOTICE** When operating a tilted outboard, do not run above idle speed. Keep the water intakes submerged at all times to prevent the engine from overheating.
**Tilt Support Lever**

If you intend to leave the outboard tilted for a period of time, engage the tilt support lever:

1) Tilt the outboard UP using the trailering tilt switch.
2) Flip the tilt support lever down.
3) Lower the outboard until the tilt support lever rests solidly on the stern brackets.

When you are finished tilting the outboard, disengage the tilt support lever:
1) Tilt the outboard UP.
2) Flip the tilt support lever up.
3) Lower the outboard to operating position.

---

**Manual Release Valve**

If needed, the outboard will tilt up or down manually, using the manual release valve.

![Diagram of Manual Release Valve]

1. Manual release screw 007030

**WARNING**

Keep everyone clear of a tilted outboard when backing out the manual release screw. The outboard could drop suddenly and forcibly. Be sure to tighten the manual release screw after manually repositioning the outboard. Tightening the screw also reactivates the outboard’s impact protection and reverse thrust capability.

1) Turn the manual release screw counterclockwise, slowly (about 3 1/2 turns), until it lightly contacts its retaining ring.
2) Reposition the outboard.
3) Tighten the manual release valve to hold the outboard in its new position.
4) Thrust rod is normally in the lowest position, position 1.
Using Your Evinrude E-TEC Outboard

IMPACT DAMAGE PROTECTION

Your outboard has a shock absorption system designed to help withstand damage from impact with underwater objects at low to moderate speeds. High speed impacts with rigid underwater objects like pilings or boulders can be beyond the capability of the absorption system. Such impacts can result in serious damage to your outboard and injury to boat occupants from the outboard or its parts entering the boat. Occupants can also be ejected or injured by falling against portions of the boat as a result of rapid deceleration following impacts.

When boating in unfamiliar, shallow, or debris-laden waters, seek information on safe boating areas and navigation hazards from a reliable local source. Reduce your speed and keep a sharp lookout!

IMPORTANT: Impact damage is NOT covered by the outboard warranty.

If you hit any object:
• STOP immediately and examine the outboard for loosening of attaching hardware.
• INSPECT for damage to swivel and stern brackets, and steering components.
• EXAMINE the boat for structural damage.
• TIGHTEN any loosened hardware.

If the collision occurred in the water, proceed slowly to harbor. Before boating again, have your Dealer thoroughly inspect all components.

WARNING

Failure to inspect for damage after an accident or striking an object could result in sudden, unexpected component failure, loss of boat control, and personal injury. Unrepaired damage could reduce your boat and outboard’s ability to resist future impacts.
**ENGINE MONITORING**

**S.A.F.E. ENGINE SYSTEM**

This outboard is equipped with Speed Adjusting Failsafe Electronics (S.A.F.E.).

S.A.F.E. is an engine warning system controlled by the Engine Management Module (EMM). The EMM monitors engine sensors. If conditions which could cause permanent engine damage exist, the EMM limits engine speed to 1200 RPM.

If engine is in S.A.F.E. mode, the outboard will shake noticeably when accelerated above 1200 RPM.

For additional protection during severe operating conditions the EMM will shut OFF the engine.

⚠️ WARNING

In the S.A.F.E. mode, the engine speed is limited. Under certain conditions, the engine’s limited speed may reduce maneuverability of your boat.

If the S.A.F.E. mode is activated and you are unable to correct the problem, seek assistance and/or return to safe harbor. Serious engine damage, engine shutoff, and/or reduced maneuverability may be imminent.

The EMM activates S.A.F.E. mode for:

- NO OIL warning; indicates a nearly empty oil tank. Refer to **Filling the Oil Tank** and **Priming the Oil System** on page 20.
- OVERHEAT warning; indicates an engine or EMM overheat condition. Refer to **Engine Overheating** on page 43.
- FAULT warning; indicates a problem exists. The EMM has identified a problem with the outboard. Seek assistance and/or return to harbor immediately. See your Dealer.

**ENGINE OVERHEATING**

**NOTICE** Do not run your outboard—even for a brief start-up—without supplying water to it. Refer to Flushing on page 54.

While boating, the outboard’s water intakes must stay completely submerged and unobstructed. Observe proper transom height and tilt angle. While the outboard is running, the outboard’s water pump indicator must discharge a steady stream of water. Check the indicator often, especially when operating in weeds, muddy and debris-laden water, and at extreme trim angles.

If the engine overheats, the S.A.F.E. (Speed Adjusting Failsafe Electronics) mode will immediately limit the engine’s speed to 1200 RPM. If the engine was running faster than 1200 RPM when the S.A.F.E. mode activated, it will shake noticeably. The protection system must be **RESET** before the engine will operate at speeds over 1200 RPM. Under certain conditions the EMM will shut off the engine.

To RESET the system after an overheat:

- The engine must be shut off and the cooling temperature restored.

**IF** the S.A.F.E. mode activates and the stream from the water pump indicator becomes intermittent or stops, reduce speed to idle and:

1) Shift to NEUTRAL.
2) SHUT OFF the engine.
3) Tilt the outboard up.
4) Clean the intake screens of any blockage.
5) Clean the water pump indicator of any blockage.
6) Lower the outboard.
7) Restart the engine and run at idle.

**IF** cleaning the screens and indicator *does not* restore the water pump indicator’s steady discharge, the engine will operate only in “get home” mode. Return to harbor immediately. See your Dealer.

**IF** cleaning the screens and indicator *does re-*store the water pump indicator’s steady discharge, you might have to run for two minutes in NEUTRAL to allow the engine to cool.

**NOTICE** If cooling is not restored, the EMM will identify a progressive overheating condition and shut off the engine. The engine will not restart until the engine is allowed to cool.

After any overheat causing engine shutdown, see your Dealer for:
- Inspection of the water pump for excessive wear or damage.
- Inspection of the thermostat(s).

**NOTICE** Although the S.A.F.E. mode can help prevent engine damage, it does not guarantee you can run your engine indefinitely without engine damage.

**Diagnostic LEDs**

The Engine Management Module (EMM) has four LED indicators located on the top corner of the circuit board.

The LEDs provide quick reference to the status of several outboard systems.

The LEDs can be used to identify specific warning functions of S.A.F.E. mode activation without ending a day on the water.

**IMPORTANT:** LED 1 is closest to the center of the EMM.

To view the LEDs the engine cover must be removed. Refer to *Filling the Oil Tank* on page 20.

The LEDs identify system functions in two modes, Start Mode and Running Mode.

As the outboard is being started, all four LEDs should light and then go OFF in sequence.

When the outboard is running, all LEDs should be OFF.

**Running Mode**

If any LED is ON while the outboard is running, it may indicate a system problem. Refer to *EMM Diagnostics Label*.

LED 1, 2, or 3 ON, return to port as soon as practical to avoid operational difficulties. See your Dealer.

LED 4 ON indicates:
- EMM temp. ABOVE range, refer to *Engine Overheating* on page 43.
- Engine temp. ABOVE range, refer to *Engine Overheating* on page 43.
- Low / No Oil condition. Refer to *Filling the Oil Tank* and *Priming the Oil System* on page 20.
**WARNING**

Do not run the engine in a low oil condition for a long period of time. If run in excess of 4 hours, the engine will shut down and will not restart. See dealer if engine shuts down.

**Start Mode**

If any of the LEDs does NOT light during starting, it may indicate an engine problem. Refer to *EMM* Diagnostics Label.

LED 1, 2, or 3 OFF, seek assistance to return to port. See your Dealer.

LED 3 flashing indicates a hazardous fuel condition may exist. Seek assistance to return to port. See your Dealer.

LED 4 OFF indicates the stop circuit is activated, make sure the engine cut–off switch tether cord is attached.

LED 4 flashing indicates engine shut down:

- *EMM* temp. OVER range, refer to *Engine Overheating* on page 43.
- Engine temp. OVER range, refer to *Engine Overheating* on page 43.
- Excessive No Oil condition. Seek assistance to return to port.

**Self-Test**

During engine start-up, pause with the key switch in the ON position. The engine monitoring system self-tests the warning horn by sounding a half-second beep. The *SystemCheck* gauge self-tests by turning the indicator lights on simultaneously, then off in sequence.

**IMPORTANT:** If the self-test does not happen as stated, see your Dealer.

**LOW OIL Warning**

The LOW OIL warning activates the warning horn for 10 seconds and the low oil gauge light for a minimum of 30 seconds.

The *SystemCheck* warning will reoccur at the next startup if the problem is not corrected.

If the “LOW OIL” warning light illuminates, refill the oil tank immediately. You have a limited amount of normal operation before running out of oil. Fill the oil tank with recommended oil as soon as possible. Refer to *Oiling System information* on page 19.

**“LOW OIL”**

<table>
<thead>
<tr>

<tr>
<td>Low oil light is ON. Oil in the oil tank is at reserve level or lower.</td>
<td><em>EMM</em> will activate S.A.F.E. mode soon.</td>
<td>Refill oil tank with the recommended oil. If the oil tank is full, return to safe harbor and seek assistance.</td>
</tr>
</tbody>
</table>
SPECIAL OPERATING CONDITIONS

AUXILIARY OUTBOARD OPERATION
Place the outboard in the full TILT position when not in use.

**NOTICE** Shift the outboard to FORWARD or REVERSE when not in use and tilted up. Propeller spinning while not in use may damage the outboard.

COLD AND FREEZING WEATHER

**NOTICE** When operating in conditions under 32°F (0°C), Evinrude/Johnson XD100 oil, must be used.

During operation in freezing weather, keep the gearcase submerged at all times.

Upon removing your outboard from the water, leave it in a vertical position until its cooling system is drained. Store the outboard vertically.

If the outboard’s gearcase is equipped with an integral speedometer pickup, all water must be cleared from the hose to prevent gearcase damage. Refer to Transporting / Storage on page 48.

**NOTICE** Water remaining in the gearcase, cooling system or other components can freeze, causing serious engine damage.

HIGH ALTITUDE
Your outboard’s EMM will automatically compensate for changes in altitude. However, if you boat above 3000 ft. (900 m), you will experience a slight loss of power due to reduced air density.

If your engine drops below the recommended RPM operating range at full throttle, have your Dealer select a lower pitch propeller.

If you return to sea level, have your Dealer install the original propeller and verify correct RPM operating range.

SALT WATER
Anode protection for the outboard has been provided for use in salt or brackish water.

Upon removal from salt water, leave outboard in a vertical position until its cooling system has drained. During long periods of mooring, tilt the gearcase out of the water, except in freezing temperatures. Flush the outboard, if desired. Refer to Flushing on page 54.

DUAL OUTBOARD OPERATION
When in reverse above slow speed, be sure both outboards are running, even if one is in NEUTRAL.

If it is necessary to return to harbor with one outboard not running, tilt the inoperative outboard high enough to keep its propeller out of the water.
Salt Water Lubrication Points

**SHALLOW WATER**

Gearcase damage can occur if the gearcase is allowed to drag on the waterway bottom. Use caution when operating in shallow water.

**IMPORTANT:** Impact damage is NOT covered by the outboard warranty.

**UNDER TOW**

Should you require a tow from another boat:
- Shift the outboard to FORWARD or REVERSE
- Tilt its gearcase out of the water;
- Off-load all persons into another boat; and
- Keep speed slower than planing speed.

**WEEDY WATER**

Weeds block water intakes and may cause your outboard to overheat. Weeds on the propeller create vibration and reduce boat speed.

When operating in weedy water, run at slow speeds and in REVERSE frequently to clear weeds from the propeller and water intakes. Check the water pump indicator often.

If REVERSE operation does not clear away weeds, SHUT OFF the engine. Remove weeds from propeller area and water intakes before operating at higher speed.

---

https://www.boat-manuals.com/
TRANSPORTING THE OUTBOARD

**WARNING**

If engine is equipped with a quick-disconnect fuel hose, you MUST disconnect the fuel hose from the engine and the fuel tank to prevent fuel leaks:

- Whenever the engine is NOT being used
- Whenever the engine is being trailered
- Whenever the engine is in storage

A small amount of fuel may be released when the fuel connector is disconnected. Always wipe off any fuel spillage. Store portable fuel tanks in well-ventilated areas, away from heat sources and open flames. Close the vent screw of the fuel tank cap, if equipped, to prevent escape of fuel or fuel vapors which could accidentally ignite. Do not allow disconnected fuel hoses to leak fuel.

**NOTICE**

Use of the steering friction lever to position the outboard for trailering may cause damage to the outboard.

**TRANSPORTING / STORAGE**

If the outboard is laid down for transportation or storage it should be laid on its back.

**IMPORTANT:** The oiling system must be primed before reusing the outboard. Refer to Priming the Oil System on page 20.

If the engine is transported laying on its side, protect the motor covers, by laying it on an old blanket or other soft cloth.

**NOTICE** Shift the outboard to FORWARD or REVERSE when trailering. Propeller spinning during transport may damage the outboard.

**NOTICE** The outboard must be restrained when trailering. Bouncing during transport may damage the outboard and the boat’s transom.

**NOTICE** Use of the tilt support bracket or tilt lock lever when trailering may cause damage to the outboard.

---

## PRE-RIDE INSPECTION

### WARNING

Always perform a pre-ride inspection before operating the boat. Check the proper operation of critical controls, safety features and mechanical components. Correct any problems BEFORE leaving the dock. Make sure all safety equipment required by local law is onboard.

### WARNING

The engine(s) should be OFF and the tether cord must always be removed from the engine cut-off switch before verifying any of the following. Only start the engine(s) after all items have been checked and operate properly.

Maintenance
ENGINE EMISSIONS INFORMATION

Maintenance, replacement, or repair of the emission control devices and systems may be performed by any marine SI (spark ignition) engine repair establishments or individual.

Manufacturer’s Responsibility
Beginning with 1999 model year outboards, manufacturers of marine engines must determine the exhaust emission levels for each engine horsepower family and certify these outboards with the United States of America Environmental Protection Agency (EPA). An emissions control information label, showing emission levels and engine specifications, must be placed on each outboard at the time of manufacture.

Dealer’s Responsibility
When performing service on all 1999 and more recent Evinrude outboards that carry an emissions control information label, adjustments must be kept within published factory specifications.

Replacement or repair of any emission related component must be executed in a manner that maintains emission levels within the prescribed certification standards.

Dealers are not to modify the outboard in any manner that would alter the horsepower or allow emission levels to exceed their predetermined factory specifications.

Exceptions include manufacturer’s prescribed changes, such as altitude adjustments, for example.

Owner Responsibility
The owner/operator is required to have engine maintenance performed to maintain emission levels within prescribed certification standards.

The owner/operator is not to, and should not allow anyone to, modify the engine in any manner that would alter the horsepower or allow emissions levels to exceed their predetermined factory specifications.

Tampering with the fuel system to change horsepower or modify emission levels beyond factory settings or specifications will void the product warranty.

EPA Emission Regulations
All new 1999 and more recent Evinrude outboards manufactured by BRP are certified to the EPA as conforming to the requirements of the regulations for the control of air pollution from new watercraft marine spark ignition engines. This certification is contingent on certain adjustments being set to factory standards. For this reason, the factory procedure for servicing the product must be strictly followed and, whenever practicable, returned to the original intent of the design. The responsibilities listed above are general and in no way a complete listing of the rules and regulations pertaining to the EPA requirements on exhaust emissions for marine products. For more detailed information on this subject, you may contact the following locations:

Routine inspection and maintenance is necessary to prolong outboard life. The following chart provides guidelines for inspection and maintenance to be performed by an authorized Dealer.

**IMPORTANT:** Outboards used in rental, commercial, or other high hour applications require more frequent inspections and maintenance. Adjust schedule for operating and environmental conditions.

(1) Average recreational use. Commercial use, heavy use, or use in salt or polluted water requires more frequent inspection and maintenance (annual checks are recommended).

(2) Annually in salt water applications – Refer to Service on page 54.

(3) Emission-related component. Refer to Owner Responsibility on page 52, Product Warranty Information on page 71 and, if applicable, California Emission Control Warranty Statement on page 74.

(4) Replace boat-mounted fuel filter annually. Refer to Boat-Mounted Fuel Filters on page 66.

A. HPF Pro Gearcase Lubricant in high performance or commercial applications
B. Evinrude/Johnson Biodegradeable TNT Fluid
C. Triple-Guard Grease
D. Starter Bendix Lube ONLY, P/N 337016

https://www.boat-manuals.com/
ANTI-CORROSION ANODES

Your outboard is equipped with one or more anodes that protect it from galvanic corrosion. Disintegration of the anode is normal and indicates it is working. Check each anode periodically. Replace anodes smaller than 2/3 their original size. See your Dealer for replacements.

Galvanic corrosion destroys underwater metal parts and can occur in fresh or salt water; however, salt, brackish, and polluted waters will accelerate corrosion.

Metal-based antifouling paint on the boat or outboard and the use of improperly installed shore power in the area of your moored boat will also accelerate corrosion.

**NOTICE** NEVER paint the anode, its fasteners, or its mounting surface. Painting will reduce its corrosion protection.

FLUSHING

Flush the outboard with fresh water following use in brackish, salt or polluted water to minimize the accumulation of scale and silt deposits in cooling system passages. The outboard can be flushed on the trailer or at dockside. Place outboard in vertical (down) position in a well ventilated area.

**NOTICE** If you cannot store the outboard in the recommended vertical position, be sure the cooling system is drained completely. Never place the gearcase higher than the powerhead. Any water remaining in the exhaust passages can run into the cylinders and cause serious damage.

**Using Lower Engine Cover Flushing Port**

1) Place the outboard in an area with good drainage.
2) Connect garden hose to flushing port.
3) Turn on the water. It is not necessary to run the engine for a good flushing.

4) Leave the outboard in vertical position long enough to completely drain the powerhead.
Using Gearcase Flushing Device

1) Place the outboard in an area with good drainage.

2) Temporarily cover the two small auxiliary water inlet holes on each side of the gearcase with heavy tape to insure enough water travels to the powerhead from the water intakes. Water can drain from auxiliary inlets, resulting in engine overheating. Remember to uncover the holes after flushing the engine.

3) Remove propeller and place the shift lever in NEUTRAL position.

4) Connect garden hose to flushing device and install flushing device on gearcase.

5) Turn on the water. Keep the water pressure between 20 and 40 psi (140 to 300 kPa).

6) Start the engine and RUN AT IDLE SPEED. Flush engine for at least five minutes. A steady stream of water must flow from exhaust relief port of outboard.

7) Turn engine OFF. Leave the outboard in vertical position long enough to completely drain the powerhead.

FUSE

On outboards equipped with an accessory electric starter, a blown fuse will not allow the engine to start. Replace it with a fuse of the same rating. A spare fuse is provided.

Repeated fuse failures indicate a potentially serious problem. Do not replace it with a higher rated fuse; see your Dealer for service.

In an emergency, the engine may be rope-started and run; this will not harm the engine.

Fuse Replacement

NOTICE Use only fuses of the same rating. Your Evinrude E-TEC outboard uses 10-amp fuses.

Remove engine cover. Install spare fuse in place of failed fuse.

NOTICE Failure to install cover securely may cause electrical problems.

HULL FINISH

The condition of your boat’s bottom affects performance. Marine growth or bottom painting may reduce speed and fuel efficiency.

For maximum performance, keep the boat’s running surface clean by rinsing it with fresh water and wiping it dry. Apply Evinrude anti-corrosion spray to any surface subject to corrosion, but avoid the anti-corrosion anode(s).
Maintenance

OUTBOARD EXTERNAL FINISH
Your outboard’s upper and lower engine covers use molded-in color technology, providing a deep, durable gloss with maximum ultraviolet (sunlight) protection.

The high gloss finish will show polish marks when viewed closely in certain light conditions. This glossing is NORMAL.

Periodically, wash the entire boat and outboard with soapy water and apply a coat of automotive wax. Leave the engine cover in place when washing the outboard.

NOTICE When trailering your outboard, DO NOT cover the engine with canvas—it will dull the finish of the outboard’s engine covers.

SCRATCH REPAIR
Surface scratches on the upper and lower engine covers can be polished out with buffing compound.

Treat affected areas using these steps:
1) Sand the affected area with 800-grit sandpaper.
2) Wet sand the area with 1200-grit sandpaper.
3) Using a composite material buffing compound, polish the area, closely following the product directions.

NOTICE Your Dealer has the professional materials to properly repair scratches. Do not attempt to paint over marks or scratches in the composite material. See your Dealer to repair any deep scratches or gouges.

SPARK PLUGS

⚠️ CAUTION
The ignition system presents a serious shock hazard. Use caution to avoid injury from shock or injury resulting from your reaction to shock. Do not handle primary or secondary ignition components while the engine is cranking or running.

Spark plugs should be serviced by an Evinrude E-TEC Dealer. Incorrect spark plug maintenance can lead to engine damage.

NOTICE Replacement spark plugs MUST be indexed correctly.

Marine Engine Duty Cycles
The International Council of Marine Industry Associations (ICOMIA) Standard No. 36-88 specifies a marine engine duty cycle based on documented studies. A duty cycle is a profile of engine running and usage. This duty cycle is used to determine average spark plug longevity and maintenance requirements for Evinrude E-TEC outboards.

<table>
<thead>
<tr>
<th>ICOMIA Marine Engine Duty Cycle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engine Speed as Percentage of Rated Speed (RPM)</td>
</tr>
<tr>
<td>IDLE</td>
</tr>
<tr>
<td>40%</td>
</tr>
<tr>
<td>60%</td>
</tr>
<tr>
<td>80%</td>
</tr>
<tr>
<td>100%</td>
</tr>
</tbody>
</table>

NOTICE Some running profiles and conditions can lead to spark plug wear sooner than expected. Depending on your specific usage, the spark plug maintenance schedule may require adjustment.

SUBMERGED OUTBOARD
If your outboard has been under water, have it serviced immediately upon recovery. If immediate service is unavailable, resubmerge it in fresh water to avoid prolonged exposure to the atmosphere.

After submersion, all boat and engine electrical, fuel, and oiling systems must be inspected for signs of water intrusion. Your Dealer should perform this service.

https://www.boat-manuals.com/
STORAGE

⚠️ WARNING
DO NOT run the engine indoors or without adequate ventilation or permit exhaust fumes to accumulate in confined areas. Engine exhaust contains carbon monoxide which, if inhaled, can cause serious brain damage or death.

You must protect against natural environmental conditions that can be damaging to an outboard. Your warranty does not cover engine failure caused by these conditions.

NOTICE
Temperature and humidity changes during storage period can cause corrosion of internal engine components.

Winterization prepares your outboard for long-term off-season storage. During winterization, the engine is “fogged” and extra oil is used to coat internal engine components. Refer to Long-Term Storage (Winterization) on page 58.

Stabilize the fuel supply. Fuel remaining in your fuel tank can oxidize, resulting in loss of octane and fuel system deposits.

Use Evinrude/Johnson 2+4 Fuel Conditioner to prevent gum and varnish deposits from forming in fuel system components. Refer to Operation on page 24.

⚠️ WARNING
If engine is equipped with a quick-disconnect fuel hose, you MUST disconnect the fuel hose from the engine and the fuel tank to prevent fuel leaks:
- Whenever the engine is NOT being used
- Whenever the engine is being trailered
- Whenever the engine is in storage

NOTE: A small amount of fuel may be released when the fuel connector is disconnected.

Store fuel tanks in well-ventilated areas, away from heat sources and open flames.

Prevent escape of fuel or fuel vapors which could accidentally ignite.

Close the vent screw of the fuel tank cap (if equipped).

Do not allow disconnected fuel hoses to leak fuel.

If the outboard is laid down for transportation or storage, the oiling system must be primed before reusing the outboard. Refer to Priming the Oil System on page 20.

SHORT-TERM STORAGE
(BETWEEN USES)
If you must tilt the outboard to remove it from the water, lower it and allow the cooling system to drain completely as soon as you clear the launch area. Between uses, store your outboard in a vertical position.
LONG-TERM STORAGE (WINTERIZATION)

**WARNING**

Outboard must be in NEUTRAL before performing winterization. Starting outboard in gear can cause personal injury. If winterizing on a trailer, the propeller must be removed before performing procedure. Failure to remove propeller can cause personal injury or death.

Winterization prepares your outboard for long-term off-season storage. During winterization, the engine is “fogged” and extra oil is used to coat internal engine components.

**Note:** The Long-Term Storage procedure can be used to prime the oiling system.

Winterization requires a specific process of steps.

Closely follow the applicable winterization procedure for your outboard:
- Remote control
- Tiller control
- Remote control with foot throttle

If you are unsure which procedure is right for you, contact your Dealer for assistance.

You can confirm your outboard enters winterization mode when the engine runs at fast idle.

**Preparation**

Your outboard can be winterized in the water. **If winterizing in water**, make sure the water intake screens are completely submerged.

1) Stabilize the engine’s fuel supply. Add **2+4 Fuel Conditioner** following instructions on container. Fill fuel tank.

2) **If winterizing on a trailer**, remove the propeller. Attach a garden hose to flushing port and turn on the water. Refer to **flushing** on page 54.

3) Outboard must be in NEUTRAL, and remote control and shift linkage must be in NEUTRAL position at all times during winterization procedure.

**Remote Control Outboards**

1) **For side mount controls**, fully lift the fast idle lever. Start the outboard. Outboard runs at slow idle speed.

2) After outboard runs for at least 15 seconds:

   **For binnacle or concealed side mount controls**, press fast idle button and fully advance throttle handle. Start the outboard. Outboard runs at slow idle speed.

   **For binnacle or concealed side mount controls**, return throttle handle to IDLE position.
Outboard continues to run at slow idle speed.

3) After outboard runs for another 15 seconds:

For side mount controls, fully raise the fast idle lever again.

For binacle or concealed side mount controls, fully advance throttle handle again.

Outboard will accelerate to fast idle speed and fog itself.

4) Allow outboard to run until it shuts itself OFF automatically (one to two minutes).

Winterization is complete when outboard shuts itself off.

- If the outboard DOES NOT shut itself off, you may not have used the fast idle lever or button and the outboard was shifted into gear.
- If the engine exceeds 3000 RPM, the outboard may have been shifted into gear.

In either event, immediately turn the key switch OFF and re-start the procedure.

Tiller Control Outboards

1) Fully advance throttle grip. Start the outboard. Outboard runs at slow idle speed.

2) After outboard runs for at least 15 seconds, move throttle grip to IDLE position. Outboard continues to run at slow idle speed.

3) After outboard runs for another 15 seconds, fully advance the throttle grip again. Outboard will accelerate to fast idle speed and fog itself.

4) Allow outboard to run until it shuts itself OFF automatically (one to two minutes).

Winterization is complete when outboard shuts itself off.

- If the outboard DOES NOT shut itself off, you may not have properly advanced throttle grip.
- If the engine exceeds 3000 RPM, the outboard may have been shifted into gear.

In either event, immediately press the engine cut–off switch to turn outboard OFF and re-start the procedure.
Remote Control Outboards with Foot Throttle

1) Fully advance the foot throttle. Start the outboard. Outboard runs at slow idle speed.

2) After outboard runs for at least 15 seconds, remove foot from foot throttle and allow throttle to return to IDLE position. Outboard continues to run at slow idle speed.

3) After outboard runs for another 15 seconds, fully advance the foot throttle again. Outboard will accelerate to fast idle speed and fog itself.

4) Allow outboard to run until it shuts itself OFF automatically (one to two minutes).

Winterization is complete when outboard shuts itself off.
- If the outboard DOES NOT shut itself off, you may not have allowed enough running time at a throttle position.
- If the engine exceeds 3000 RPM, the outboard may have been shifted into gear.

In either event, immediately turn the key switch OFF and re-start the procedure.

After Winterization – All Outboards

1) After the outboard shuts itself off, turn key switch OFF. (For tiller models, remove engine cut-off clip / key switch.) Do not start the outboard again after winterization is completed.

2) If winterizing on a trailer, turn off water and detach garden hose. Grease propeller shaft splines with recommended lubricant, and re-install propeller.

**NOTICE** When winterizing is finished, leave the outboard in vertical position long enough to completely drain the powerhead. If equipped, disconnect the speedometer pickup at the upper connection and blow all water out of the hose using air pressure of 25 psi or less. Reconnect speedometer pickup after all the water has been removed.

3) Top off oil tank.

Extra engine oil is used during the winterization procedure. Some excess oil may appear on the skeg below the gearcase area. **This is normal.**

Avoid potential oil stains by placing a shop towel or suitable container under the propeller and skeg for the duration of the storage.
PRE-SEASON CHECK

Remove your outboard from storage and prepare it for a season of reliable service by performing a general check and a few preventive maintenance procedures.

Examine all loosened or removed hardware. Replace damaged or missing parts with Evinrude/Johnson Genuine Parts or equivalent. Check the gearcase for leakage. If leakage is evident, the gearcase seals should be replaced. See your Dealer.

IMPORTANT: Gearcase lubricant is thick and clear. Do not confuse this with engine oil, which may normally appear on the skeg after performing the long-term (winterization) storage procedure.

Anticorrosion anodes — Check condition. Refer to Anti-Corrosion Anodes on page 54.

Battery — Charge fully. Refer to Battery - Electric Start Models on page 66.

⚠️ WARNING

Do not use a booster battery and jumper cables to start the outboard. Gasoline fumes can cause explosion and fire, resulting in property damage, personal injury or death.

Review your outboard’s warning system self-test routine. During your preseason start-up, make sure the warning system self-tests properly. If it does not, see your Dealer.

NOTICE

Do not run your outboard—even for a brief start-up—without supplying water to it.

Following Engine Starting / Stopping - Tiller Models on page 24 or Engine Starting / Stopping - Remote Control Models on page 30, start the outboard. If the outboard was auto-winterized, it will emit a puff of smoke on the first start of the season.

Let engine idle while you:

Observe running quality. If poor, refer to Troubleshooting on page 62 or see your Dealer.

Confirm water pump operation. Water must flow from the water pump indicator in a steady stream. If it does not, shut off the outboard and investigate. Refer to Engine Overheating on page 43.

Stop the outboard and check the fuel system for leaks.

⚠️ WARNING

Failure to check for fuel leakage could allow a leak to go undetected, resulting in fire or explosion.
## TROUBLESHOOTING

<table>
<thead>
<tr>
<th>SYMPTOM</th>
<th>POSSIBLE CAUSE</th>

• Fuel system contaminated with water or dirt.  
• Oiling system malfunction.                                                                                                                                 |
| Engine runs, but makes little or no progress | • Throttle needs to be reset, refer to Refer to **Operation** on page 24.  
• Propeller hub loose, slipping.  
• Propeller blades bent or missing.  
• Propeller shaft bent.  
• Propeller debris.                                                                                                                                 |
| Warning system activates               | • Refer to **Engine Overheating** on page 43.                                                                                                                                           |
Use an appropriate hoist to lift the engine. Refer to Specifications on page 70 for engine weight.

**WARNING**

Your outboard must not exceed the maximum horsepower indicated on the boat’s capacity plate. Such over powering can cause loss of control. Contact your Dealer or the boat’s manufacturer if your boat lacks a capacity plate.

Boats designed for remote-steered outboards might be overpowered by a tiller-steered outboard of the maximum rated horsepower. Ask your Dealer or boat manufacturer if you are unsure about your boat’s suitability.

Incorrectly matched boat and outboard transom heights can cause boat instability and loss of control. Refer to Transom Height.

Prevent lateral movement and possible outboard loss by using the mounting hardware supplied or hardware of sufficient size, strength, and quality. Refer to Installing the Outboard on page 65.

A mounting surface that is damaged or too thin to support your outboard while underway might fail during operation, causing a loss of control. Be sure the boat’s transom or mounting bracket is structurally sound and between 1 5/8 in. (41 mm) and 2 3/4 in. (70 mm) in thickness.

**NOTICE**

Use an appropriate hoist to lift the engine. Refer to Specifications on page 70 for engine weight.

**TRANSMOM HEIGHT**

Make sure the transom height matches the length of the outboard to be installed.
- A 19 to 21 in. (48.3 to 53.3 cm) transom height uses a 20 in. (50.8 cm) shaft outboard.
- The shaft length of the outboard being installed should come close to matching the transom height of the boat.
- Refer to Specifications on page 70 for transom height.

Determine transom height by measuring from the top edge of the transom, along the centerline.

Boat performance depends on outboard mounting height.

Generally, the anti-ventilation plate of the gearcase should align with the bottom of the hull. Conventional V-hulls often perform well with the anti-ventilation plate approximately 1 in. (25 mm) above the bottom of the hull.

The anti-ventilation plate should NOT extend more than 2 in. (5 cm) BELOW the bottom of the hull.

Test outboard and boat performance at different heights until the best performance is achieved.

**IMPORTANT**: Be sure that outboard water pressure is not adversely affected by the mounting height of the outboard.

https://www.boat-manuals.com/
INSTALLING THE OUTBOARD

⚠️ WARNING
The outboard must be correctly installed. Failure to correctly install the outboard could result in serious injury, death or property damage. We strongly recommend that your Dealer install your outboard to ensure proper installation.

IMPORTANT: Follow all directions carefully. The outboard’s warranty will not cover product damage or failure that results from incorrect outboard installation.

Refer to Priming the Oil System on page 20.

Mounting DH, DR, DRL, HP and HT Models

⚠️ WARNING
Even if equipped with clamp screws, your outboard must be bolted to the boat to prevent it from “working off the transom” during operation.

Center the outboard on the transom (or mounting bracket) and tighten clamp screws by hand.

Use the outboard stern brackets as a template for location and size of holes to drill in the transom.

Use each stern bracket’s mounting holes as a guide to drill 5/16 in. (7.9 mm) holes through the transom. Drill two (2) mounting holes on 25 / 30 HP models and (4) mounting holes on 15 HO models.

Install the mounting bolts through the stern brackets and transom. Install large washers and locknuts onto bolts and tighten securely.

1. Drilled transom holes
2. Bolts

⚠️ WARNING
When replacing bolts, screws, or other fasteners, use Evinrude/Johnson parts or parts of equivalent strength and material.

25 / 30 DR & DRL Models
1. Drilled transom holes

https://www.boat-manuals.com/
BOAT-MOUNTED FUEL FILTERS

Boat-mounted fuel filters and water-separating fuel filter assemblies must meet the following requirements:

- **Fuel flow** – 0.4 in. Hg maximum pressure drop at 20 gph (76 l/hr) flow.
- **Filter area** – 150 in.² (1290 cm²) of filter area.

The filter must be mounted to a rigid surface above the full level of the fuel tank and accessible for servicing.

Fuel Filter Assembly, P/N 174176, meets all requirements for a water-separating fuel filter.

If equipped, replace the boat-mounted fuel filter annually. See your dealer for replacement Fuel Filter (25 micron), P/N 502905.

BATTERY - ELECTRIC START MODELS

**Requirements**

- 12-volt, heavy-duty, designated for "marine" use;
- Vented/refillable or maintenance-free; and
- Rated according to the minimum requirements in **Specifications** on page 70.

Deep-cycle batteries are suitable **IF** they meet or exceed the minimum CCA requirements.

Ask your Dealer about your outboard’s requirements before installing longer battery cables or a battery switch.

### Installation

**WARNING**

Read and understand the safety information supplied with your battery BEFORE you begin installation.

**NOTICE**

Make sure all components are clean and free of corrosion. Connect the RED (+) cable to the positive (+) battery post first. Connect the BLACK (–) cable to the negative (–) battery post last.

If you have marine battery posts, install each main cable on the clamp adapter with a star-washer below it. Install all wires from accessories on the threaded portion of the post.

---

**Diagram**

1. Main cable
2. Starwasher
3. Accessory wires
If you have automotive battery posts, place a starwasher on the clamp adapter first, then the main cable, and then the wires from the accessories.

Tighten all connections securely and coat the installation with *Triple-Guard* grease.

**WARNING**
Keep the battery connections clean, tight, and insulated to prevent their shorting or arcing and causing an explosion. If the battery mounting system does not cover the connections, install covers. Check often to see that connections stay clean and tight.

**WARNING**
Battery electrolyte is acidic — handle with care. If electrolyte contacts any part of the body, immediately flush with water and seek medical attention.
Do not use a booster battery and jumper cables to start the outboard. Gasoline fumes can cause explosion and fire, resulting in property damage, personal injury or death.
**Product Information**

**PROPELLER**

**Propeller Selection**

To select the correct propeller for your boating application, your boat and outboard MUST be water tested. See your Dealer for assistance.

**IMPORTANT:** The correct propeller for your boat, under normal load conditions, will allow the engine to run near the midpoint of the RPM operating range at full throttle. Refer to Specifications on page 70.

**⚠️ WARNING**

When servicing the propeller, always shift the outboard to NEUTRAL position, turn the key switch OFF, and twist and remove all spark plug wires so the outboard cannot be started accidentally.

**Installation**

**NOTICE** Apply Triple-Guard grease to the entire propeller shaft before installing the propeller. At least annually, remove the propeller and check for debris. Clean the shaft and regrease it before reinstalling a propeller.

Slide thrust washer onto shaft with fishline trap groove facing forward.

Slide propeller onto shaft, engaging the splines and seating it on the thrust bushing.

Slide spacer onto the shaft and engage the propeller shaft splines.

Wedge a block of wood between the propeller blade and the anti-ventilation plate.

Install propeller nut and tighten to a torque of 120-144 in. lbs. (13.6-16.3 N·m).

**IMPORTANT:** If cotter pin holes in the propeller nut and propeller shaft are not aligned, tighten the nut until they are in line. Do not loosen.

Install new cotter pin and bend ends to secure.

Remove block of wood. Make sure engine is in NEUTRAL; give propeller a spin. It must turn freely.

**Repair**

If your propeller hits a solid object, the impact is partially absorbed by the bushing in the hub to help prevent damage to the outboard. A strong impact can damage the hub and propeller blades. Damage to blades can cause unusual and excessive vibration. Damage to the hub can cause excessive engine RPM with little forward movement.

**NOTICE** Avoid or limit operation using a damaged propeller. Carry a spare propeller.

Keep your propeller in good condition. Use a file to smooth slight damage to blade edges. See your Dealer for repair of serious damage.
**ADJUSTMENTS**

**Trim Tab**

**WARNING**
Improper trim tab adjustment can cause difficult steering.

A propeller will generate steering torque when the propeller shaft is not running parallel to the water’s surface. The trim tab is adjustable to compensate for this steering torque.

**IMPORTANT:** A single trim tab adjustment will relieve steering effort under only one set of speed, outboard angle and load conditions. No single adjustment can relieve steering effort under all speed, outboard angle and load conditions. If the boat pulls to the left or right when its load is evenly distributed, adjust the trim tab as follows:

**With the outboard shut OFF**, loosen the trim tab screw. If the boat pulled to the right, move the rear of the trim tab slightly to the right. If the boat pulled to the left, move the rear of the trim tab slightly to the left.

Tighten the trim tab screw to a torque of 60-84 in. lbs. (7-9 N·m).

Test the boat and, if needed, repeat the procedure until steering effort is as equal as possible.

**High outboard installations** — The trim tab might be above the water when the outboard is trimmed out. Steering effort might increase. Steering effort will be reduced if you trim the outboard in and submerge the trim tab.

**Friction**

**Throttle Friction** — Adjust until a slight drag is felt when accelerating or decelerating only. DO NOT overtighten.

**Steering Friction** — The steering friction was set on your outboard at the factory. A slight drag should be felt when turning the outboard with the steering handle.

If adjustment is necessary, turn the adjustment screw:
- Clockwise to increase friction; or
- Counterclockwise to decrease friction.

**WARNING**
Do not overtighten for “hands-off” steering. Reduced steering control could result.

(2) Emission Control Information.  
(3) Use a 800 CCA (1000 MCA) battery when operating in temperatures below 32°F (0°C).  
(4) Use Evinrude/Johnson HPF Pro Gearcase Lubricant for high performance outboards and commercial applications. Evinrude/Johnson HPF Pro Gearcase Lubricant delivers exceptional durability and reliability and promotes long gearcase life in marine use.

https://www.boat-manuals.com/
BRP US INC. LIMITED WARRANTY FOR EVINRUDE OUTBOARD ENGINES SOLD IN THE UNITED STATES AND CANADA

1. SCOPE OF THE LIMITED WARRANTY
BRP US Inc.* (*BRP*) warrants its Evinrude® outboard engines sold by authorized Evinrude dealers in the fifty United States and Canada (*Product*) from defects in material or workmanship for the period and under the conditions described below.

2. EXCLUSIONS — The following are not warranted under any circumstances:
• "Replacement of parts due to normal wear and tear;
• "Routine maintenance parts and services including but not limited to: maintenance requirements, engine and lower unit oil changes, lubrication, valve and linkage adjustments and replacement of fuses, zinc anodes, thermostats, timing belts, starter motor bushings, trim motor brushes, filters, propellers, propeller bushings and spark plugs;
• "Damage caused by improper or lack of installation, maintenance, winterization and/or storage, failure to follow the procedures and recommendations in the Operator's Guide;
• "Damage resulting from removal of parts, improper repairs, service, maintenance, or modification, or use of parts or accessories not manufactured or approved by BRP, which in its reasonable judgment, are either incompatible with Product or adversely affect its operation, performance, or durability, or resulting from repairs done by a person that is not an authorized Dealer (as described below);
• "Damage caused by abuse, misuse, abnormal use, neglect, racing, improper operation or operation of the Product in a manner inconsistent with the recommended operation described in the Operator's Guide;
• "Damage resulting from external damage, accident, submersion, water ingestion, fire, theft, vandalism or any act of God;
• "Operation without proper fuel, oil or lubrication, or with fuels, oils or lubricants which are not suitable for use with the Product (see the Operator's Guide);
• "Damage resulting from rust or corrosion;
• "Damage caused from cooling system blockage by foreign material;
• "Damage resulting from sand or debris in the water pump;
• "Cosmetic or paint changes due to exposure to the elements.
This warranty will be voided in its entirety and rendered null and void where:
• "Product has been altered or modified in such a way so as to adversely affect its operation, performance or durability, or change its intended use, horsepower or emission levels; or
• "Product is or has been used for racing at any point, even by a prior owner.

3. LIMITATIONS OF LIABILITY
ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANDABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO THE LIFE OF THE EXPRESS LIMITED WARRANTY.

ALL INCIDENTAL, CONSEQUENTIAL, DIRECT, INDIRECT OR OTHER DAMAGES OF ANY KIND ARE EXCLUDED FROM COVERAGE UNDER THIS WARRANTY INCLUDING, BUT NOT LIMITED TO: expense for gasoline, expense for transporting Product to and from Dealer, removal of Product from a boat and reinstallation, mechanic's travel time, in-and-out of water charges, slip or dock fees, trailering or towing, storage, telephone, cell phone, fax or telegram charges, rental of a like or replacement Product or boat during warranty services or down time, taxi, travel, lodging, loss of or damage to personal property, inconvenience, cost of insurance coverage, loan payments, loss of time, loss of income, revenue or profits, or loss of enjoyment or use of Product.

SOME STATES, PROVINCES, OR JURISDICTIONS DO NOT ALLOW FOR THE DISCLAIMERS, LIMITATIONS OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR OTHER EXCLUSIONS IDENTIFIED ABOVE. AS A RESULT, THEY MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC RIGHTS, AND YOU MAY ALSO HAVE OTHER LEGAL RIGHTS WHICH MAY VARY FROM STATE TO STATE, OR PROVINCE TO PROVINCE.

No distributor, Dealer or any other person is authorized to make any affirmation, representation or warranty regarding Product other than those contained in this limited warranty and, if made, shall not be enforceable against BRP. BRP reserves the right to modify this warranty at any time, being understood that such modification will not alter the warranty conditions applicable to the Products sold while this warranty is in effect.
4. WARRANTY COVERAGE PERIOD
This limited warranty will be in effect from the date of delivery to the first retail consumer or the date the Product is first put to use, whichever occurs first, for a period of:

THIRTY-SIX (36) CONSECUTIVE MONTHS for private, recreational use; or

TWELVE (12) CONSECUTIVE MONTHS for commercial use, except that exhaust emission-related components are warranted for sixty (60) consecutive months or one hundred seventy five (175) hours of engine use, whichever occurs first; and evaporative emission related components are warranted for twenty-four (24) consecutive months. The Product is used commercially when it is used in connection with any work or employment that generates income, during any part of the warranty period. The Product is also used commercially when, at any point during the warranty period, it is installed on a boat that has commercial tags or is licensed for commercial use. Please see your Authorized Evinrude Outboard Engine Dealer for emission-related service. In cases where the delivery date is not established to BRP's satisfaction, the date of sale will be used to determine the warranty start date.

The repair or replacement of parts or the performance of service to Product under this warranty does not extend the life of this limited warranty beyond its original expiration date. For All Evinrude/Johnson® Genuine Parts and accessories installed by an authorized dealer at the time of sale, reference the BRP parts and accessories limited Warranty Statement.

California residents who purchased or warranty-registered a Product in California should refer to BRP's California Emissions Control Warranty Statement.

5. CONDITIONS TO HAVE WARRANTY COVERAGE
This warranty coverage is available only on Evinrude outboard engines purchased as new and unused from a dealer authorized to distribute Evinrude products in the country in which the sale occurred ("Dealer"), and then only after the BRP specified pre-delivery inspection process has been completed and documented by the purchaser and Dealer. Warranty coverage only becomes available upon proper registration of Product by Dealer or owner.

Only the original purchaser and any subsequent owners who reside in the United States and Canada and have purchased Product from a U.S. or Canadian Dealer are eligible for warranty registration and warranty coverage hereunder. Such limitations are necessary in order to allow BRP to protect the safety of its products, its consumers, and the general public.

As outlined in the Operator's Guide, timely routine required maintenance must be performed to maintain warranty coverage. BRP may require proof of proper maintenance prior to authorizing warranty coverage.

6. WHAT TO DO TO OBTAIN WARRANTY COVERAGE
The registered owner must notify an authorized Dealer within two (2) days of the appearance of a defect. BRP is not responsible for damages caused by the use of a Product after the appearance of a defect. Owner must bring Product, including any defective part therein, to Dealer promptly after the appearance of the defect, and in any event, within the warranty period, and must provide Dealer with reasonable opportunity to repair the defect. The expenses of transporting Product to and from Dealer for warranty service are to be borne by the owner.

If the Product has not previously been registered, the owner may also be required to present proof of purchase to Dealer for warranty repairs. Owner is required to sign the repair/work order prior to the start of the repair in order to validate the warranty repair.

All parts replaced under this warranty become the property of BRP.

7. WHAT BRP WILL DO
BRP’s obligations under this warranty are limited to, at its sole discretion, repairing or replacing parts of Product found to be defective in material or workmanship, in the reasonable judgment of BRP. Such repair or replacement of parts will be done without charge for parts and labor, at any authorized Dealer. BRP’s responsibility is limited to making the required repairs or replacements of parts with new or BRP-certified re-manufactured parts. No claim of breach of warranty shall be cause for cancellation or rescission of the sale of Product to owner.

In the event that warranty service is required outside of the fifty United States or Canada, owner will bear responsibility for any additional charges due to local practices and conditions, such as, but not limited to, freight, insurance, taxes, license fees, import duties, and any and all other financial charges, including those levied by governments, states, territories and their respective agencies.

https://www.boat-manuals.com/
BRP reserves the right to improve, modify or change Products from time to time without assuming any obligation to modify Products previously manufactured.

8. TRANSFER

If the ownership of Product is transferred during the warranty coverage period, this warranty shall also be transferred and be valid for the remaining coverage period provided that BRP is notified of such transfer of ownership in the following way:

1. The former owner contacts BRP (at the phone number provided below) or a Dealer and gives the coordinates of the new owner; or
2. BRP or a Dealer receives a proof that the former owner agreed to the transfer of ownership, in addition to the coordinates of the new owner.

9. CONSUMER ASSISTANCE

• "In the event of a controversy or dispute in connection with this BRP limited warranty, BRP recommends that you first try to resolve the issue at the dealership level by discussing the issue with Dealer's service manager or owner;

• "If further assistance is required, please contact BRP U.S. Inc., Attn: Consumer Support, P.O. Box 597, Sturtevant, WI 53177, 1-262-884-5993.

BRP US INC. LIMITED WARRANTY FOR EVINRUDE OUTBOARD ENGINES SOLD OUTSIDE THE UNITED STATES AND CANADA

"For a copy of the Limited Warranty, see your Bombardier Recreational Products ("BRP") distributor/dealer authorized to distribute Evinrude products in the country in which the sale occurs. If further assistance is required, please contact BRP US Inc., Attn: After Sales Support, P.O. Box 597, Sturtevant, WI 53177, or the affiliate of BRP where the Product was registered for warranty.

* Engines sold in Canada are distributed and serviced by Bombardier Recreational Products Inc.

Limited Warranty Revision US/CA March 2013
Product Information

CALIFORNIA EMISSION CONTROL
WARRANTY STATEMENT

Your Evinrude E-TEC outboard has a special environmental label required by the California Air Resources Board. The label has one, two, three, or four stars. A hangtag, provided with your outboard, describes the meaning of the star rating system.

The Star Label Means Cleaner Marine Engines

The Symbol for Cleaner Marine Engines:

Cleaner Air and Water
For a healthier lifestyle and environment.

Better Fuel Economy
Burns up to 30 to 40 percent less gas and oil than conventional carbureted two-stroke engines, saving money and resources.

Longer Emission Warranty
Protects consumer for worry free operation.

One Star – Low Emission
The one-star label identifies Personal Watercraft, Outboard, Sterndrive and Inboard engines that meet the Air Resource Board's Personal Watercraft and Outboard marine engine 2001 exhaust emission standards. Engines meeting these standards have 75% lower emissions than conventional carbureted two-stroke engines. These engines are equivalent to the U.S. EPA's 2006 standards for marine engines.

Two Stars – Very Low Emission
The two-star label identifies Personal Watercraft, Outboard, Sterndrive and Inboard engines that meet the Air Resources Board's Personal Watercraft and Outboard marine engine 2004 exhaust emission standards. Engines meeting these standards have 20% lower emissions than One Star – Low Emission engines.

Three Stars – Ultra Low Emission
The three-star label identifies engines that meet the Air Resources Board's Personal Watercraft and Outboard marine engine 2008 exhaust emission standards or the Sterndrive and Inboard marine engine 2003 exhaust emission standards. Engines meeting these standards have 65% lower emissions than One Star – Low Emission engines.

Four Stars – Super Ultra Low Emission
The four-star label identifies engines that meet the Air Resources Board's Sterndrive and Inboard marine engine 2009 exhaust emission standards. Personal Watercraft and Outboard marine engines may also comply with these standards. Engines meeting these standards have 90% lower emission than One Star – Low Emission engines.

For more information: Cleaner Watercraft – Get the Facts
1-800-END-SMOG
www.arb.ca.gov
YOUR EMISSION CONTROL WARRANTY RIGHTS AND OBLIGATION

The California Air Resources Board and Bombardier Recreational Products ("BRP") are pleased to explain the emission control system warranty on your Evinrude E-TEC outboard. In California, new outboard engines must be designed, built, and equipped to meet the State's stringent anti-smog standards. BRP must warrant the emission control system on your outboard for the periods of time listed below provided there has been no abuse, neglect, or improper maintenance of your outboard.

Your emission control system may include parts such as the carburetor or fuel injection system, the ignition system, and catalytic converter. Also included may be hoses, belts, connectors, and other emission-related assemblies.

Where a warrantable condition exists, BRP will repair your outboard at no cost to you including diagnosis, parts, and labor provided that such work is performed by an authorized BRP dealer.

Manufacturer's Limited Warranty Coverage

This emission limited warranty covers Evinrude outboards certified and produced by BRP for sale in California, that are originally sold in California to a California resident, or subsequently warranty-registered to a California resident. The BRP U.S. and Canada limited warranty conditions for Evinrude outboards are still applicable to these models with the necessary modifications.

Select emission control parts of your Evinrude E-TEC outboard are warranted from the date of purchase by the first retail consumer or the date the product is first put to use, whichever occurs first, for a period of: 4 years, or for 250 hours of use, whichever occurs first.

However, warranty coverage based on the hourly period is only permitted for outboards equipped with the appropriate hour meters or their equivalent. If any emission-related part on your engine is defective under warranty, the part will be repaired or replaced by BRP.

Parts covered are:

The emission warranty covers damage to other engine components that is caused by the failure of a warranted part. The BRP Operator's Guide provided contains written instructions for the proper maintenance and use of your outboard. All emission warranty parts are warranted by BRP for the entire warranty period of the outboard, unless the part is scheduled for replacement as required maintenance in the Operator's Guide.

Emission warranty parts that are scheduled for replacement, as required maintenance, are warranted by BRP for the period of time before the first scheduled replacement date for that part. Emission warranty parts that are scheduled for regular inspection but not regular replacement are warranted by BRP for the entire warranty period of the outboard. Any emission warranty part repaired or replaced under the terms of this warranty statement is warranted by BRP for the remainder of the warranty period of the original part. All parts replaced under this limited warranty become the property of BRP.

Maintenance receipts and records should be transferred to each subsequent owner of the outboard.

Owner’s Warranty Responsibilities

As the outboard owner, you are responsible for the performance of the required maintenance listed in your Operator's Guide. BRP recommends that you retain all receipts covering maintenance on your outboard, but BRP cannot deny warranty solely for the lack of receipts or your failure to ensure the performance of all scheduled maintenance.

As the outboard owner, you should however be aware that BRP may deny you warranty coverage if your outboard or a part has failed due to abuse, neglect, improper maintenance, or unapproved modifications.

You are responsible for presenting your outboard to an authorized BRP dealer as soon as a problem exists. The warranty repairs will be completed in a reasonable amount of time, not to exceed 30 days.

For any questions regarding your warranty rights and responsibilities or for the name and location of the nearest authorized BRP dealer, contact BRP US Inc., After Sales Support, P.O Box 597, Sturtevant, WI 53177, 1-262-884-5993 or visit www.evinrude.com.

https://www.boat-manuals.com/
BRP US INC. INTERNATIONAL LIMITED WARRANTY:  
EVINRUDE®/JOHNSON® OUTBOARD ENGINES

1. SCOPE OF THE LIMITED WARRANTY

BRP US Inc. ("BRP") warrants its Evinrude®/Johnson® outboard engines ("Product(s)") sold by distributors or dealers authorized by BRP to distribute Evinrude®/Johnson® outboard engines ("OE Distributor/Dealer") outside of the fifty United States or Canada from defects in material or workmanship for the period and under the conditions described below.

All genuine Evinrude®/Johnson® parts and accessories, including but not limited to propellers, gauges, oil tanks, remote controls, wiring and key switches that installed by an authorized OE Distributor/Dealer at the time of delivery of the Product bear the standard BRP limited warranty for Evinrude®/Johnson® genuine parts and accessories. See your authorized OE Distributor/Dealer for a full copy of such limited warranty.

This limited warranty will become null and void if: (1) the Product was used for racing or any other competitive activity, at any point, even by a previous owner; or (2) the Product has been altered or modified in such a way so as to adversely affect its operation, performance or durability, or (3) the Product has been altered or modified to change its intended use.

2. LIMITATIONS OF LIABILITY

TO THE EXTENT PERMITTED BY LAW, THIS WARRANTY IS EXPRESSLY GIVEN AND ACCEPTED IN LIEU OF ANY AND ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. TO THE EXTENT THAT THEY CANNOT BE DISCLAIMED, THE IMPLIED WARRANTIES ARE LIMITED IN DURATION TO THE LIFE OF THE EXPRESS WARRANTY. INCIDENTAL AND CONSEQUENTIAL DAMAGES ARE EXCLUDED FROM COVERAGE UNDER THIS WARRANTY. SOME JURISDICTIONS DO NOT ALLOW FOR THE DISCLAIMERS, LIMITATIONS AND EXCLUSIONS IDENTIFIED ABOVE, AS A RESULT, THEY MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC RIGHTS, AND YOU MAY ALSO HAVE OTHER LEGAL RIGHTS WHICH MAY VARY FROM COUNTRY TO COUNTRY. (FOR PRODUCTS PURCHASED IN AUSTRALIA SEE CLAUSE 4 BELOW).

Neither the OE Distributor/Dealer nor any other person has been authorized to make any affirmation, representation or warranty regarding the product, other than those contained in this limited warranty, and if made, shall not be enforceable against BRP.

BRP reserves the right to modify this warranty at any time, being understood that such modification will not alter the warranty conditions applicable to the Products sold while this warranty is in effect. If the Products were purchased under a governmental contract, the terms of such contract supersede the terms stated herein.

3. EXCLUSIONS - ARE NOT WARRANTED

The following are not warranted under this limited warranty under any circumstances:

• Normal wear and tear;
• Routine maintenance adjustments including but not limited to: maintenance requirements, lower unit oil change, lubrication, linkage adjustments and replacement of fuses, zinc anodes, thermostats, starter motor bushings, trim motor brushes, filters and spark plugs;
• Negligence or failure to provide proper maintenance including winterization and/or storage or failure to follow the procedures and recommendations in the Operator’s Guide;
• Damage resulting from removal of parts, improper repairs, service, maintenance, modification, or use of parts or accessories not manufactured or approved by BRP, which in its reasonable judgment, are either incompatible with the Product or adversely affect its operation, performance, or durability, or resulting from repairs done by a person that is not an authorized OE Distributor/Dealer;
• Damage caused by abuse, misuse, abnormal use, neglect, racing or operation of the Product in a manner inconsistent with the recommended operation described in the Operator’s Guide;
• Damage resulting from accident, submersion, water ingestion, fire, theft, vandalism or any act of God;

https://www.boat-manuals.com/
• Operation with fuels, oils or lubricants which are not suitable for use with the Product (see the Operator’s Guide);
• Damage resulting from rust or corrosion;
• Damage caused from cooling system blockage by foreign material;
• Damage resulting from sand or debris in the water pump;
• Cosmetic or paint changes due to exposure to the elements; or
• Incidental or consequential damages, or damages of any kind including without limitation towing, storage, transportation expenses, telephone, rental, taxi, inconvenience, insurance coverage, loan payments, loss of time, loss of income or time missed for downtime experience due to service work.

4. WARRANTY COVERAGE PERIOD
This warranty will be in effect from (1) the date of delivery to the first retail consumer or (2) the date the Product is first put to use, whichever occurs first, for a period of:

36 CONSECUTIVE MONTHS for private, recreational use; or

12 CONSECUTIVE MONTHS OR 750 HOURS OF OPERATION as determined by Product Engine Management Module (EMM), whichever occurs first, for commercial use.

The Product is used commercially when it is used in connection with any work or employment that generates income, during any part of the warranty period. The Product is also used commercially when, at any point during the warranty period, it is installed on a boat that has commercial tags or is licensed for commercial use.

The repair or replacement of parts or the performance of service to Product under this warranty does not extend the life of this limited warranty beyond its original expiration date.

Note that the duration and any other modalities of the warranty coverage are subject to the applicable national or local legislation in the customer’s country.

FOR PRODUCTS SOLD IN AUSTRALIA ONLY
Nothing in these Warranty terms and conditions should be taken to exclude, restrict or modify the application of any condition, warranty, guarantee, right or remedy conferred or implied under the Competition and Consumer Act 2010 (Cth), including the Australian Consumer Law or any other law, where to do so would contravene that law, or cause any part of these terms and conditions to be void. The benefits given to you under this limited warranty are in addition to other rights and remedies that you have under Australian law.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

5. CONDITIONS TO HAVE WARRANTY COVERAGE
This warranty coverage is available only if each of the following conditions has been fulfilled:

• The Product must be purchased as new and unused by its first owner from an OE Distributor/Dealer authorized to distribute Product in the country in which the sale occurred;
• The BRP specified pre delivery inspection process must be completed and documented;
• The Product must have undergone proper registration by an authorized OE Distributor/Dealer;
• The Product must be purchased within the country or union of countries in which the purchaser resides; and
• Routine maintenance outlined in the operator’s guide must be timely performed in order to maintain warranty coverage. BRP reserves the right to make warranty coverage contingent upon proof of proper maintenance as outlined in the maintenance schedule, proper service, pre ride inspection and storage conditions.

BRP will not honor this limited warranty to any private use owner or commercial use owner if one of the preceding conditions has not been met. Such limitations are necessary in order to allow BRP to preserve both the safety of its products, and also that of its consumers and the general public.
Product Information

6. WHAT TO DO TO OBTAIN WARRANTY COVERAGE

The customer must cease using the Product upon the appearance of an anomaly.
The customer must notify an authorized servicing OE Distributor/Dealer within 2 days of the appearance of a defect. The customer must bring the Product, including any defective part therein, to the OE Distributor/Dealer promptly after the appearance of the defect, and in any event, within the warranty period, and provide it with reasonable access to the product and reasonable opportunity to repair it. The customer must also present to the authorized OE Distributor/Dealer proof of purchase of the product and must sign the repair/work order prior to starting the repair in order to validate the warranty repair. The expenses of transporting Product to and from OE Distributor/Dealer for warranty service are to be borne by the owner.

All parts replaced under this warranty become the property of BRP.

Note that the notification period is subject to the applicable national or local legislation in customer's country.

7. WHAT BRP WILL DO

To the extent permitted by law, BRP's obligations under this warranty are limited to, at its sole discretion, repairing parts found defective under normal use, maintenance and service, or replacing such parts with new genuine Product parts without charge for parts and labour, at any authorized OE Distributor/Dealer during the warranty coverage period under the conditions described herein. BRP's responsibility is limited to making the required repairs or replacements of parts. No claim of breach of warranty shall be cause for cancellation or rescission of the sale of the Product to the owner. You may have other legal rights which may vary from country to country.

In the event that service is required outside of the country of original sale, the owner will bear responsibility for any additional charges due to local practices and conditions, such as, but not limited to, freight, insurance, taxes, license fees, import duties, and any and all other financial charges, including those levied by governments, states, territories and their respective agencies.

BRP reserves the right to improve or modify products from time to time without assuming any obligation to modify products previously manufactured.

8. TRANSFER

If the ownership of a Product is transferred during the warranty coverage period, this warranty shall also be transferred and be valid for the remaining coverage period provided BRP or an authorized OE Distributor/Dealer receives a proof that the former owner agreed to the transfer of ownership, in addition to the co-ordinates of the new owner.

9. CONSUMER ASSISTANCE

1. In the event of a controversy or a dispute in connection with this limited warranty, BRP suggests that you try to resolve the issue at the OE Distributor/Dealer level. We recommend discussing the issue with the authorized OE Distributor/Dealer's service manager or owner.

2. If further assistance is required, the OE Distributor/Dealer service department should be contacted in order to resolve the matter.

3. If the matter still remains unresolved then contact BRP at the address listed below:

* In the European Economic Area and elsewhere, Products are distributed and serviced by BRP European Distribution S.A. and other subsidiaries of BRP.

** The BRP limited warranty offered on Products sold in the USA and Canada is different than the one offered in the EEA and elsewhere.

**ADDITIONAL TERMS AND CONDITIONS FOR FRANCE ONLY**

The following terms and conditions are applicable to products sold in France only:

The seller shall deliver goods that are complying with the contract and shall be responsible for defects existing upon delivery. The seller shall also be responsible for defects resulting from packaging, assembling instructions or the installation when it is its responsibility per the contract or if accomplished under its responsibility. To be compliant with the contract, the good shall:

1. Be fit for normal use for goods similar thereto and, if applicable:
   • Correspond to the description provided by the seller and have the qualities presented to the buyer though sample or model;
   • Have the qualities that a buyer may legitimately expect considering the public declarations of the seller, the manufacturer of its representative, including in advertising or labeling; or

2. Have the characteristics mutually agreed upon as between the parties or be fit for the specific use intended by the buyer and brought to the attention of the seller and which accepted.

The action for failure to comply is prescribed after two years after delivery of the goods. The seller is responsible for the warranty for hidden defects of the good sold if such hidden defects are rendering the good unfit for the intended use, or if they diminish its use in such a way that the buyer would not have acquired the good or would have given a lesser price, had he known. The action for such hidden defects shall be taken by the buyer within 2 years of the discovery of the defect.

International Limited Warranty Revision March 2013
The Operator’s Readiness Test....

1. Did you read this Guide from front cover to rear cover?

2. Are you ready to take responsibility for the safe operation of your boat and outboard?

3. Do you understand all the safety precautions and instructions contained in this Guide?

4. Do you understand that this Guide contains essential information to help prevent personal injury and damage to equipment?

5. Are you ready to follow the recommendations in this Guide and take a boating safety course before you operate your boat and outboard?

6. Do you know who to ask if you have any questions about your boat and outboard?

7. Do you know your local marine traffic laws?

8. Do you understand that human error can be caused by carelessness, fatigue, overload, preoccupation, unfamiliarity of operator with the product, drugs and alcohol, just to name a few?

---

**WARNING**

It is impossible for this Guide to cover every hazardous situation you may encounter; however, your understanding of and adherence to essential information contained in this Guide will build good judgment when boating. Always be alert and careful: a good foundation for safety.
FREQUENTLY ASKED QUESTIONS

No dealer-scheduled maintenance for the first three years of normal recreational use? Really?
• Yes! BRP knows you want to spend your time out on the water, not servicing your Evinrude E-TEC outboard. There are no valves to adjust, belts to service, chains to replace, or oil to change. We do recommend pre-launch inspections of your outboard at each use and at regular intervals. Salt water applications require minimal additional inspections and lubrication.

What fuel octane is recommended for my Evinrude E-TEC outboard?
• Evinrude E-TEC outboards require a minimum octane of 87 (U.S.). Use of higher octane fuels is not harmful, but also not necessary.

What kind of oil does my Evinrude E-TEC outboard require?
• Any TC-W3RL oil may be used. The outboard can be programmed by your Dealer to run on Evinrude/Johnson XD100 oil for lower oil consumption and reduced operating cost. Refer to Filling the Oil Tank on page 20; see also Oil Requirements on page 19.

Do I need to mix oil into my fuel?
• No. Evinrude E-TEC outboards do not require any mixing of oil and fuel.

Where should I take my Evinrude E-TEC outboard for service?
• For repairs covered under warranty, you must take your Evinrude E-TEC outboard to an authorized dealer. BRP-approved dealers and distributors have received the necessary training to properly service your outboard. Contact BRP for an authorized Evinrude E-TEC dealer near you.

Can I order replacement parts and accessories for my Evinrude E-TEC outboard?
• Yes. When replacement parts are required, use Evinrude/Johnson Genuine Parts or parts with equivalent characteristics, including type, strength, and material. Using substandard parts could result in injury or product malfunction. Your dealer can order the parts and accessories you desire.

Do I need to complete any paperwork when I move or sell my Evinrude E-TEC outboard?
• Yes. In order to maintain contact with you or the new Evinrude E-TEC owner, BRP requests you complete the form outlining Change of Address / Change of Ownership on page 83. This will ensure you or the new owner is made aware of any product announcements and keep the warranty coverage up-to-date.

What do I need to do before storing my Evinrude E-TEC outboard for the winter?
• Winterization is minimal. Refer to Storage on page 57 for step-by-step instructions to store your Evinrude E-TEC outboard for the off-season.

https://www.boat-manuals.com/
If your address has changed or if there has been a change of ownership, be sure to fill out and mail the form provided on this page.

This notification is necessary for your own safety even after expiration of the original warranty, since BRP will be in a position to contact you if correction to your outboard is required. Outside the U.S. and Canada, this card should be sent to the Bombardier Recreational Products division where the outboard was registered. Please contact your Dealer or Distributor.

Owner of Model No:  

Serial No:  

(To be completed by customer or selling Dealer)

The Dealer named on this document has instructed me on the operation, maintenance, safety features and warranty policy, all of which I understand and agree to be bound with. I am also satisfied with the predelivery set-up and inspection of my *Evinrude/Johnson* outboard. I have also received a copy of the Operator’s Guide.
